## Sempre is enabling organisations to achieve 3 better business outcomes

### Business Outcome #1

#### Financial Resilience

The ability to cope financially when faced with a sudden or continuous change in revenue, expenditure or operations.

### Business Outcome #2

#### Operational Efficiency

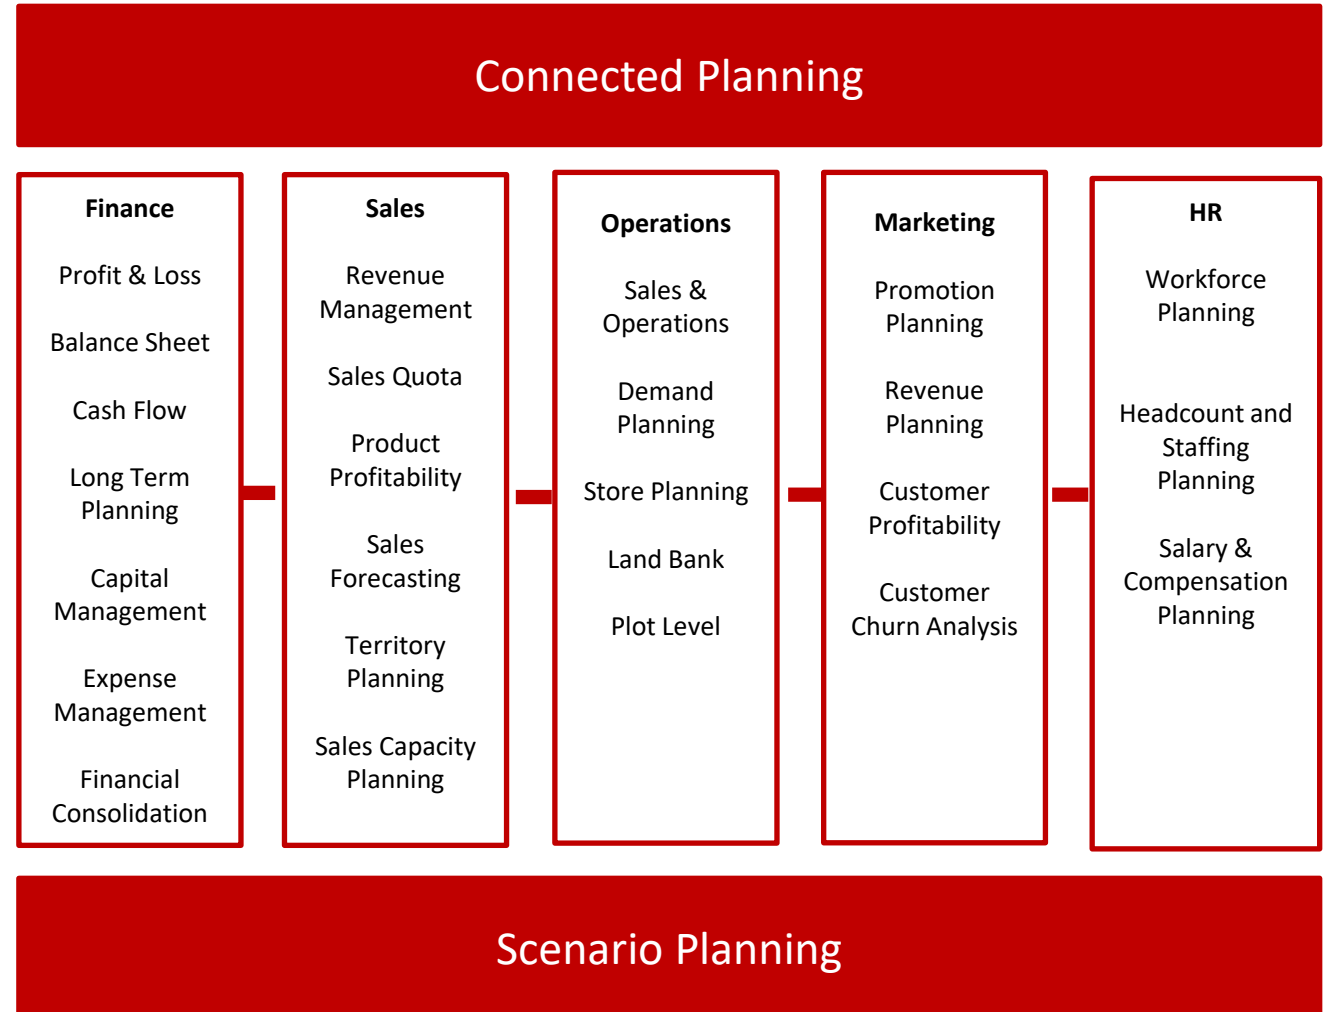

The knowledge and capability to optimise return on investment and effort across people, processes and resources.

### Business Outcome #3

#### Smarter Decisions

Development, optimisation and democratisation of models and business insight that maximise the likelihood of achieving strategic objectives.

## The support you need when you need it:

- Rapid identification and resolution of inaccuracies in your models, reports and dashboards.
- Continuous improvement of your applications to meet your evolving needs.
- Maximum confidence in the outputs of your forecasts, predictions and dashboards.
- Reduced time spent by internal teams and contractors on BAU and remedial tasks.
- Fully supported software upgrades, installs and health checks to optimise performance.
- Forecastable and consistent OPEX investment to secure the flexible service you need.
- An extendable solution that can flex as your software and solutions estate changes.
- Headcount optimisation without lessening the business value delivered by your team.
- A cost-effective service which minimises your budgetary and performance risk.

Sempre's Managed Service gives you unlimited access to the full range of service and solution capabilities to resolve your application and software issues right when you need us. Our clear annual subscription model and flexible packages ensure efficient use of your spend and forward visibility to make planning and budgeting easy for you.

## Why choose Sempre?

- **Thorough pre-installation consultation and planning**

Our approach starts with thorough evaluation of your organisational needs – not least, to ensure that this is this solution right for you. Factoring in these needs, and taking into account security and integrity, we establish what needs to be done to deliver ‘One Version of the Truth’ incorporating data from across your organisation.

- **Implementation planning for minimum disruption**

Whether you are upgrading from previous versions or adopting from scratch, we’re on hand to reduce non-availability of data and ensure ‘business as usual’ every step of the way.

- **Training**

Our aim is to get your team up to speed as swiftly as possible – with the end goal of enabling you to become self-sufficient.

- **Ongoing support**

A dedicated Customer Success Manager, ongoing access to our Support Desk, annual or biannual technology reviews ensure that you are always on top of your analytics environment. We’re here to ensure you get the very best out of your investment.
