CLOUD READINESS ASSESSMENT SERVICE

AND

CLOUD READINESS ASSESSMENT

The cross-platform expertise of ANDigital's Cloud engineers means we deliver a comprehensive assessment of your infrastructure, providing a roadmap for further development and innovation. With accredited capabilities in Microsoft Azure, Google Cloud Platform and AWS, ANDigital can advise you on appropriate platform migration, modernisation strategies and build a plan for delivery.

SERVICE FEATURES

- Review current infrastructure and application architecture
- Understand and document key expectations for Cloud infrastructure
- Define target Cloud architecture model and target architecture roadmap
- Identify opportunities for replacing functionality with Cloud native services
- Identify opportunities and risks for Cloud migration
- Shape Cloud migration team consisting of AND and client personnel
- Perform skills gap analysis in engineering teams and business

SERVICE BENEFITS

- Leverage AND expertise working with Azure, GCP and AWS
- Transparent planning process bespoke to your teams
- Backed by industry best practices
- Clearly defined outputs that are supplier-agnostic
- Business and technical review of a Cloud migration
- Adapted view of the most efficient approach to your migration
- Tailored recommendation on a Cloud service partner
- Direct one-to-one coaching for senior stakeholders

KEY CASE STUDY EXAMPLES

Ministry of Housing, Communities & Local Government

MHCLG are responsible for gathering, storing and publishing government data related to Covid-19. We undertook a Cloud readiness assessment and advised on technical activities to create a data lake and cloud ETL pipelines to migrate to AWS or Azure. We embedded processes to improve data flows and provided a roadmap for long term technology implementation. By streamlining tactical code to run sequentially we removed manual steps and saved 8hrs of development time per day.

N BROWN GROUP PLC

To help NBrown transition from a monolith platform with on-premise hosting to the Cloud, we undertook a strategic assessment of legacy infrastructure. This supported development of microservices architecture built on AWS to support rapid development, testing, and deployment and help drive the company's overall digital strategy. This reduced operational costs by 22%, production issues by 40% and deployment time from eight weeks to 1.5 hours.

ABOUT
AND Digital

AND

It's time to unlock greater value - faster.

AND Digital is a UK company built from the ground up to **accelerate digital delivery** - empowering organisations to deliver better, more efficient digital services and products today.

At the same time, we combine our technical expertise with an award-winning learning ethos. This means that even as we're helping clients ship best-in-class services, we're also helping to build the high performing digital teams and capabilities they need for continued success tomorrow.

The result?
Greater value from digital, delivered faster.

UK-wide service delivery with **9 AND offices** located across the country.

600+ Agile digital experts across product, technology, UX, delivery and data.

Onshore teams, co-located or remote, work alongside your in-house experts.

Multi-cloud expertise with **AWS, Azure and Google Cloud** certification.

200+ tech agnostic engineers to deliver smarter solutions - fast.

You retain the intellectual property for the services and products we build.

Transparent pricing and a service designed to adapt fast to your evolving needs.

Wide-ranging experience across sectors and highly regulated environments.

Ranked Outstanding for engagement and 10th Best Company to Work For in UK.*
