CI/CD and Platform Engineering

G Cloud 14 Service Definition Document

AND Digital

CI/CD, Platform Engineering, Developer Experience

AND

CI/CD, Platform, Engineering, Developer Experience

ANDigital's Platform Engineering Service develops processes to accelerate the path to production; creating scalable and reliable deployment pipelines. Using standard tooling we help build secure scalable pipelines and automation processes that enhance your continous delivery and development approaches. ANDigital has experience with CircleCI, Jenkins, Git, Docker and Octopus Deploy.

SERVICE FEATURES

- Agile delivery.
- DevOps Tools to support Cloud Architecture.
- CI/CD as service and automated process.
- Designing and developing

SERVICE BENEFITS

- Supporting in the creation of scalable and reliable deployment pipelines.
- Building secure scalable pipelines and automation processes.
- Enhancing your delivery and development approaches.
- Automated CI/CD pipelines
- Low risk.

KEY CASE STUDY EXAMPLES

Department for Education

For DfE's Early Career Payment service (2021) we adopted DevOps practices in Scrum to develop a new teacher claims platform. Our multidisciplinary team re-engineered the existing Azure DevOps system to modernise the entire CI/CD pipeline. We automated multi-stage platform, infrastructure and application deployments with Docker containerisation. This enabled test-driven development including unit, functional and security for 50% faster, zero-defect deployments.

Covea Insurance

For Covea's new "Insurance-as-a-Service" platform we worked in eight blended teams to establish a DevOps culture including an open-source approach to CI/CD tooling and development. We implemented automated testing via microservices, deployed into Azure cloud and reduced delays by 12 months.

AND

ABOUT
AND Digital

It's time to unlock greater value - faster.

AND Digital is a UK company built from the ground up to **accelerate digital delivery** - empowering organisations to deliver better, more efficient digital services and products today.

At the same time, we combine our technical expertise with an award-winning learning ethos. This means that even as we're helping clients ship best-in-class services, we're also helping to build the high performing digital teams and capabilities they need for continued success tomorrow.

The result?
Greater value from digital, delivered faster.

UK-wide service delivery with **9 AND offices** located across the country.

600+ Agile digital experts across product, technology, UX, delivery and data.

Onshore teams, co-located or remote, work alongside your in-house experts.

Multi-cloud expertise with **AWS, Azure and Google Cloud** certification.

200+ tech agnostic engineers to deliver smarter solutions - fast.

You retain the intellectual property for the services and products we build.

Transparent pricing and a service designed to adapt fast to your evolving needs.

Wide-ranging experience across sectors and highly regulated environments.

Ranked Outstanding for engagement and 10th Best Company to Work For in UK.*
