All rates are exclusive of VAT & expenses

- **The Cloud Assessment is composed of a series of workshops designed to co-create a technical vision, technical strategy, ways of working, high-level architecture, and corresponding organisational processes and structure.**
- During these workshops we will work with key stakeholders to understand the current state and aspirations of your systems. We will look at the existing technical landscape and processes as well as the requirements of end users to establish a provisional target architecture and project delivery roadmap. This roadmap will include an appreciation of the related dependencies and business priorities.
- Following the Cloud Assessment, a report containing the results of all the sessions will be presented. Should you wish to engage Codurance for the implementation phase, then this report will form the basis for the project inception.

Depending on the size and scope of the cloud assessment, this can be offered on a T&M basis or a agreed upon fixed fee.

## Day rate cards standards
