Case Study LAS Refresher training- Croydon

Investigo have had success with this activity and deliverable model in deliveries in early 2024, assisting Croydon Council recover a failed first round of delivery of training for their Social workers and SMT on the LAS modules of LiquidLogic.

Procured and implemented during the pandemic & lockdown, the Council were also suffering the early effects of the bankruptcy and the quality and uptake of the initial training delivered by the previous partner left much to be desired. In January 2024, Investigo were awarded a contract for 'LAS refresher training' by Croydon Council in Collaboration with a 3rd party provider, to deliver the refresher training.

We were selected based on Trainer and Delivery lead quality and value for money ahead of 2 other competitors. The aim; Create training content, coordinate room bookings, create course outcomes, and deliver training in a 51 day period. Investigo developed training module course content for 20+ course topics, handled complete knowledge transfer to BAU staff and delivered the training within budget and ahead of schedule.
