

Service Definition

Demystify Security was born out of the realisation that Information security has historically been viewed as a 'blocker' by most organisations.

Demystify Security will provide high quality, experienced and qualified security consultants to add value to your business in order to enable and improve business critical services.

The following services are provided:-

Risk Assessment and Management in line with industry recognised standards such as IS27005 and COBIT.

Governance, Risk and Compliance

Vulnerability Management and Planning

Secure by Design as a Service

GovAssure/CAF (NCSC Cyber Assessment Framework)

Security Architecture Design and review, including for Cloud environments such as Azure and AWS.

Incident Response, support and management

Protective Monitoring Solution Design

Security Operation Centre (SOC) support

Security Awareness Training

Virtual CISO

Board Level Simulations

Threat Modelling

Cyber Essentials Readiness/Certification support

Software Development Lifecycle Review in line with standards such as BSIMM and OWASP SAMM.

Planning, Scoping and executing Red Team exercises and IT Health Checks

Cyber Apprentice Management/Activity Coordination

Demystify Security provide support in a manner and language that is understandable and ultimately enables your business activity. The Demystify way is to educate and empower.
