

# Azure Integration Services

## ROI Calculator

Embark on a transformative journey from legacy integration to Azure. Our ROI calculator reveals the efficiency gains and significant cost savings that Azure Integration Services provide. Experience streamlined operations, innovation, and growth.

Step into the future with Azure Integration—where each calculated move brings tangible returns.

### Inputs

#### Licensing

- Current License Entitlements
- Annual Renewal Costs & Compliance if applicable

#### Platform

- Hosting or Internal Infrastructure Costs
- Support / Upgrade Costs

#### Run (BAU Support and Development)

- Minor and Major Patches
- SLAs and Hours of Service
- Internal and External Costs

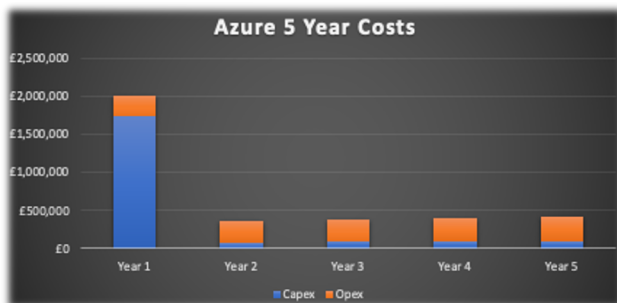

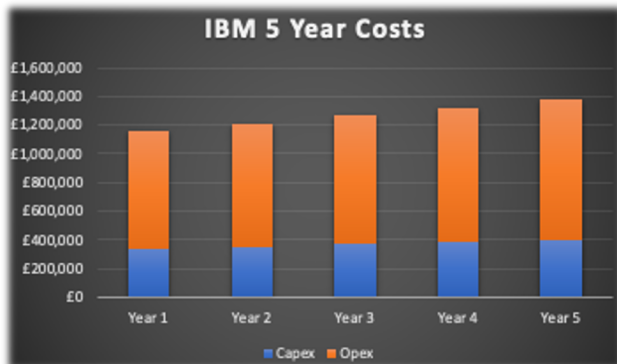

#### Restrictions

- Data and Security
- Environments

#### Migration Requirements

- Low, Medium, High, Very High Integration Classification and Quantity
- Testing and Project Costs

Where is the system hosted by organisation internally or outsourced / Cloud?	Internally
Internal - What platform is used and quantity	
Internal - Estimated cost of Hosting / Platform per annum	£45,000
Internal - What additional platform licenses are required & Annual Cost	£15,000
Internal - How many hours per annum is spent on maintaining / supporting platform and associated tasks	150
Internal - Where is support for the platform located geographically	United Kingdom
Internal - Is there expected to be any major migration / upgrades in next 5 years. Please describe and indicate expected one-off costs if known.	No
Outsourced / Cloud - What is the annual platform costs for supporting the IBM integration technology software	N/A
<b>BAU Support for IBM technology</b>	
How many minor software patches are undertaken each year	0 (included in BAU Cost)
Approximate Effort estimation for a minor software patch	0 (included in BAU Cost)
How many major software patches are undertaken each year	1
Approximate Effort estimation for a major software patch	120
Where is support team located geographically	United Kingdom
What are the hours of support	7am - 7pm Mon-Fri
What SLAs are in place for support team	TBC
BAU Support team internal or outsourced to a third party	Third Party
Outsourced - Annual cost of support	£350,000
Outsourced - Metrics for measuring support levels	Capacity Based
Internal - Annual cost of support (if known)	N/A
Internal - How many hours of BAU support are provided per annum	N/A
<b>Development</b>	
How many FTEs are employed to support integration development projects	0
How many internal development days are used each year	0
Where is your development team located geographically	United Kingdom
What are the costs per annum of the use of third party development services	£120,000
<b>Other</b>	
Are there any restrictions on where data can be located	Yes - UK only
How many environments do you currently use (Prod, Pre Prod, UAT, Dev .. Etc)	3
Are there any security restrictions on leveraging SaaS services (such as Azure)	Yes - UK only
<b>Migration</b>	
How many 'low' complexity integrations reside in the current integration solution	9
How many 'medium' complexity integrations reside in the current integration solution	10
How many 'high' complexity integrations reside in the current integration solution	10
How many 'very high' complexity integrations reside in the current integration solution	10
Where is a restriction on where development can take place geographically	UK Only
Are there any restrictions on where development can take place geographically	UK Only

## Outputs

### Side by Side Comparison

- Annual ongoing Costs
  - Licensing
  - Compliance Events
  - BAU Support
  - Development

### Migration Assessment

- Project Rough Order of Magnitude
  - Requirements Gathering
  - Design and Development
  - Testing
  - Go-Live Support
- External / Supplier Costs
- Internal Project Costs
- High Level Project Timeline

### Return on Investment Assessment

- Years 1 – 5 ROI
- All inputs adjustable for internal review and changes
- Breakdown of Capex vs Opex Spend

## Let's Get Started

Please reach out to one of our expert team to discuss your current situation and select a suitable day for your us to conduct a workshop to ascertain your requirements.
