

Hippo

G Cloud 14

Services

Hippo is a UK-based, sector-wide, digital service delivery partner, working alongside organisations including the BBC, DFE, DWP, MOJ, MOD and the NHS.

Our digital transformation approach bridges the gap between user-centred design principles and robust engineering, data and cyber practices, leading to transformational results, including improved public service access/functionality.

Capabilities

Research & Design

Our Research and Design teams help our clients design accessible services that genuinely meet user needs, by;

- Gaining real user insights
- Better understanding user behaviours through quantitative and qualitative research
- Prototyping based on user needs
- Measuring usability
- Creating understandable content and user journeys

Product & Delivery

Our Product and Delivery teams take a user centred, agile approach to deliver the most value to users and customers, by;

- Defining the right Product Strategy and product structures
- Creating agile delivery models that focus on delivering prioritised needs and value first
- Analysing the needs of the business to ensure outcomes enable positive change

Engineering & Data

Our Engineering and **Data teams** ensure that your products and services create long term organisational success, by;

- Developing technical solutions that optimise business performance
- Creating reliable and flexible solutions that enable future organisational growth
- Harnessing the power and potential of data and AI

Flexible Delivery Models

Full Hippo team

Deploying full Hippo multidisciplinary teams and squads, and fully delivering outcomes on behalf of our sponsors.

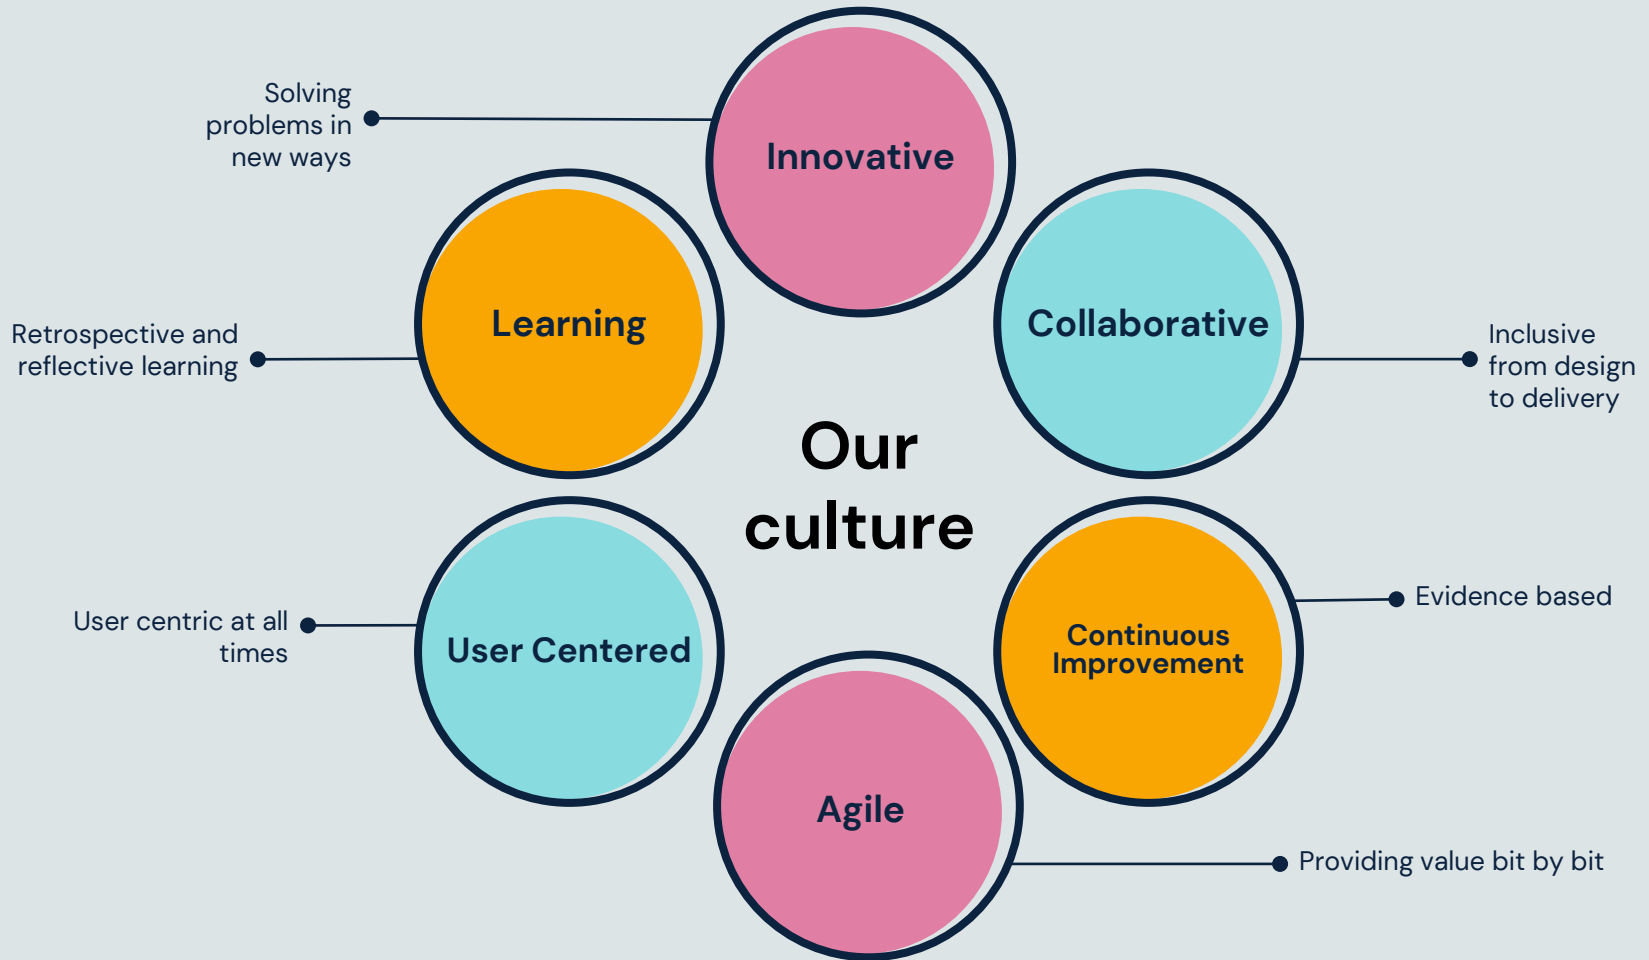

Part of the team

Adding our people and experience into client teams; providing coaching and mentoring, filling a capability gap, and/or leading teams.

Rainbow team

Collaborating with various different client and vendor teams to deliver as part of a successful 'rainbow team'.

Data Health Check Service

Data Health Check Service

Our Data Health Check Service provides UK public sector organisations with a thorough assessment of data quality, integrity, and compliance. We conduct an in-depth review of your data systems to identify areas for improvement and ensure alignment with UK data protection regulations. Our user-centred approach optimises data management processes and enhances the reliability of your data for informed decision-making.

Features

- Comprehensive data quality assessment and integrity checks.
- Evaluation of data governance and compliance practices.
- Identification of data silos and duplication issues.
- Advanced data analysis using programming languages like Python and R.
- Review of data storage and access control measures.
- Data mapping to visualise data flows and relationships.
- Recommendations for data quality improvements.
- Use of leading frameworks such as DAMA DMBOK.
- Detailed report outlining findings and action points.
- Collaboration with stakeholders for holistic data health insights.

Benefits

- Improved data quality for more reliable decision-making.
- Enhanced compliance with UK data protection regulations.
- Increased operational efficiency from streamlined data processes.
- Better allocation of resources based on data insights.
- Stronger data governance for better data management.
- Cost savings through efficient data maintenance and usage.
- Reduction in data redundancy and inconsistencies.
- Clear roadmap for ongoing data quality improvements.
- Improved user experiences with accurate, reliable data.
- Ongoing support for sustained data health and success.

Hippo approach

- Service iterated and customised to meet specific needs
- Service supported with robust and documented business continuity and disaster recovery plans at an organisation and service level
- Service levels and support needs tailoring to meet business and user needs
- Matured onboarding and offboarding approach tailored to meet your needs, including ongoing support or aftercare what needed, including outage and maintenance management as required
- Service can be hosted by client or Hippo according to requirements
- Technical requirements, dependencies and constraints analysed at onboarding
- Data security and migration needs are fully met and assured through our ISO 27001 and Cyber Essentials plus certified approach
- Service delivered sustainably in line with our ESG commitments and 14001 certification

Thank you 🙌
