

Hippo

G Cloud 14

Services

Hippo is a UK-based, sector-wide, digital service delivery partner, working alongside organisations including the BBC, DFE, DWP, MOJ, MOD and the NHS.

Our digital transformation approach bridges the gap between user-centred design principles and robust engineering, data and cyber practices, leading to transformational results, including improved public service access/functionality.

Capabilities

Research & Design

Our Research and Design teams help our clients design accessible services that genuinely meet user needs, by;

- Gaining real user insights
- Better understanding user behaviours through quantitative and qualitative research
- Prototyping based on user needs
- Measuring usability
- Creating understandable content and user journeys

Product & Delivery

Our Product and Delivery teams take a user centred, agile approach to deliver the most value to users and customers, by;

- Defining the right Product Strategy and product structures
- Creating agile delivery models that focus on delivering prioritised needs and value first
- Analysing the needs of the business to ensure outcomes enable positive change

Engineering & Data

Our Engineering and **Data teams** ensure that your products and services create long term organisational success, by;

- Developing technical solutions that optimise business performance
- Creating reliable and flexible solutions that enable future organisational growth
- Harnessing the power and potential of data and AI

Flexible Delivery Models

Full Hippo team

Deploying full Hippo multidisciplinary teams and squads, and fully delivering outcomes on behalf of our sponsors.

Part of the team

Adding our people and experience into client teams; providing coaching and mentoring, filling a capability gap, and/or leading teams.

Rainbow team

Collaborating with various different client and vendor teams to deliver as part of a successful 'rainbow team'.

Data Hack Day Event

Data Hack Day Event

Our Data Hack Day service provides UK public sector organisations with a unique, collaborative event to solve cross-departmental challenges using data. Led by experienced consultants and experts, participants work together to explore data, generate insights, and create innovative solutions. Our user-centred approach ensures that outcomes align with your strategic goals and address specific problems.

Features

- Collaborative environment for cross-departmental data problem-solving.
- Hands-on experience with programming languages like Python and R.
- Utilisation of data visualisation tools such as Tableau and Power BI.
- Access to expert facilitators and experienced consultants.
- Exploration of data sets for actionable insights.
- Creation of prototypes to address real-world challenges.
- User-centred design to enhance data-driven solutions.
- Data cleaning and preparation for quality insights.
- Workshops and learning sessions on data methodologies.
- Opportunity for participants to share knowledge and network.

Benefits

- Enhanced problem-solving through collaborative data exploration.
- Improved cross-departmental relationships and communication.
- Greater understanding of data-driven decision-making.
- Identification of innovative solutions for public sector challenges.
- Increased efficiency through optimised data processes.
- Personal and professional development for participants.
- Exposure to new data tools, technologies, and practices.
- Strengthened focus on user-centred data design.
- Creation of prototypes that may lead to implementation.
- Ongoing support and follow-up for sustained success.

Hippo approach

- Service iterated and customised to meet specific needs
- Service supported with robust and documented business continuity and disaster recovery plans at an organisation and service level
- Service levels and support needs tailoring to meet business and user needs
- Matured onboarding and offboarding approach tailored to meet your needs, including ongoing support or aftercare what needed, including outage and maintenance management as required
- Service can be hosted by client or Hippo according to requirements
- Technical requirements, dependencies and constraints analysed at onboarding
- Data security and migration needs are fully met and assured through our ISO 27001 and Cyber Essentials plus certified approach
- Service delivered sustainably in line with our ESG commitments and 14001 certification
