Confidentiality

This document (the “Proposal”) contains information that is confidential to Clinical Architecture Limited (“Clinical Architecture”) and is disclosed for potential customers to use solely for the purposes of evaluating Clinical Architecture’s Proposal. Neither the Proposal nor the information therein may be used for any other purpose nor disclosed to any other party, either whole or in part, without the prior written consent of Clinical Architecture. Potential customers may permit their employees, advisors, and agents having a need to know the contents of this Proposal and to have access to the contents as are strictly necessary, but the potential customer shall ensure that such employees, advisors, and agents are bound to it by a confidentiality obligation which covers the Proposal. The potential customer’s acceptance of these obligations shall be indicated by the customer’s use of any of the information contained in this Proposal.

Clinical Architecture acknowledges that the potential customer may be bound by the Freedom of Information Act 2000 (“FOIA”). In such a case, Clinical Architecture considers that the contents of the Proposal are confidential and exempt from disclosure pursuant to Section 41 of FOIA. The potential customer should consult Clinical Architecture before making any disclosure of information relating to Clinical Architecture or the Proposal under FOIA. Clinical Architecture’s pricing information, methodologies, solutions, as well as any reference to Clinical Architecture’s clients and their projects are always considered by Clinical Architecture to be exempt from disclosure by virtue of Sections 41 and 43 of FOIA, whether indicated or not.

Product/Service Information: Any descriptions of future functionality reflect current product direction and are provided for informational purposes only and do not constitute a commitment to provide specific functionality. Timing and availability remain at Clinical Architecture’s discretion and are subject to change and applicable regulatory approvals.

Service Definition

Company Overview

Founded in 2007, a team of 85 healthcare and software professionals, Clinical Architecture delivers healthcare enterprise data quality solutions focused on managing disparate data to help customers succeed with reference data management, master data management, analytics, population health and improving direct care. Our solutions produce trusted, actionable data to enable smart decisions that mitigate risk, reduce cost and improve outcomes.

Clinical Architecture is 100% employee-owned with a Head office in Indiana, US and a regional office in the UK. Clinical Architecture understands how the differences in standards and interoperability affect an organisation's ability to deliver quality care. Our clinical content solutions provide a flexible approach to address a wide variety of issues – enabling organisations to achieve a meaningful impact on the quality, cost and outcomes of healthcare.

Consultancy Services

At Clinical Architecture we focus on addressing the issues present in the healthcare industry surrounding semantic interoperability, data quality and governance. We work with organisations to:

- Support the adoption of clinical coding standards, such as SNOMED CT
- Normalise and map terms between disparate terminologies to either exchange or prepare data for analytics.
- Analyse patient data through a terminology aware rules engine.
- Improve data quality.
- Set-up (Implementation) and migrate (to cloud) our products / solutions
