

# Cloud-based Data Tools

## Selection & Procurement Services

### Pricing Document for G-Cloud 13

May 2022

Data To Value provides specialist professional services built on experienced and skilled people with expertise in tools to support data focussed activities. **Data Tools** – covers a range of products from free or open-source to enterprise scale cross functional data management stacks.

Our mission is to enable your needs to automate manual or legacy processes, mitigate regulatory risks, improve service levels both internally and externally and drive efficiencies.

In addition, we work with a number of partners bringing skills that complement and enhance the professional services we provide.

We offer discounted day rates from our standard SFIA rate card based on the complexity and scale of your needs, and the mix of on-site vs off-site resources required, at each procurement stage.

*(All rates excluding VAT; Seniority labels 4-7 from SFIA rate card; Rates are per consulting day)*
