Smart Buildings and Facilities Discovery

Service Definition
G-Cloud 14 2024

DIGITALLY DRIVEN, SOCIALLY EMPOWERED

Service Overview

**Smart Buildings and Facilities Discovery**

Initial discovery workshop/s, follow-up interviews and executive playback exploring current and future estate and facilities management strategy, projects and needs. BetterGov will help you to define the optimum technology, people and process environment required to deliver your organisation's plans and articulate how to get from ideas to tangible execution.

DIGITALLY DRIVEN, SOCIALLY EMPOWERED

Features

- Pre-workshop discovery to identify/clarify organisational strategic intent

- BetterGov PoV on smart buildings, facilities enablement, buildings information modelling

- As-is experience mapping; current operating model, environment, systems readiness

- To-be experience mapping; data ecosystem, technology infrastructure, performance management

- Pain point and risk clustering, analysis and prioritisation

- Identify and quantify workplace, services, building maintenance and sustainability opportunities

- Filter and sense-check opportunities into ideas e.g. Digital Twins

- Present back ideas and prioritise based on impact vs. effort

- Data, analytics and IoT ecosystems: 3rd party partners, vendors, components

- Turn high priority ideas into proposed estate management strategy/plan

About Us

Who we are?

BetterGov started out as system implementation experts in Local Government and now support some of the largest Central Government Departments in delivering cloud and transformation programmes. We are user-focused, results-driven and Agile. We have experienced teams which can embed seamlessly with your existing people, deliver as a stand-alone teams or work to enhance your existing capabilities through training, coaching and mentoring.

What do we do?

We work in the open, collaborating with client teams and 3rd parties to deliver cloud and transformational change. We often act as a Technical Delivery Partner, supporting clients to build new products and transform their services. We also deliver on fixed scope pieces of work adhering to the GDS service standards taking services from discovery through to alpha, beta, and live. We can engage flexibly through fixed-price, capped T&M, and results-based models.

BETTERGOV
