- Flexibly deployed teams can be scaled up/down as needed
- Proven integration of multi-disciplinary skills in a collaborative environment

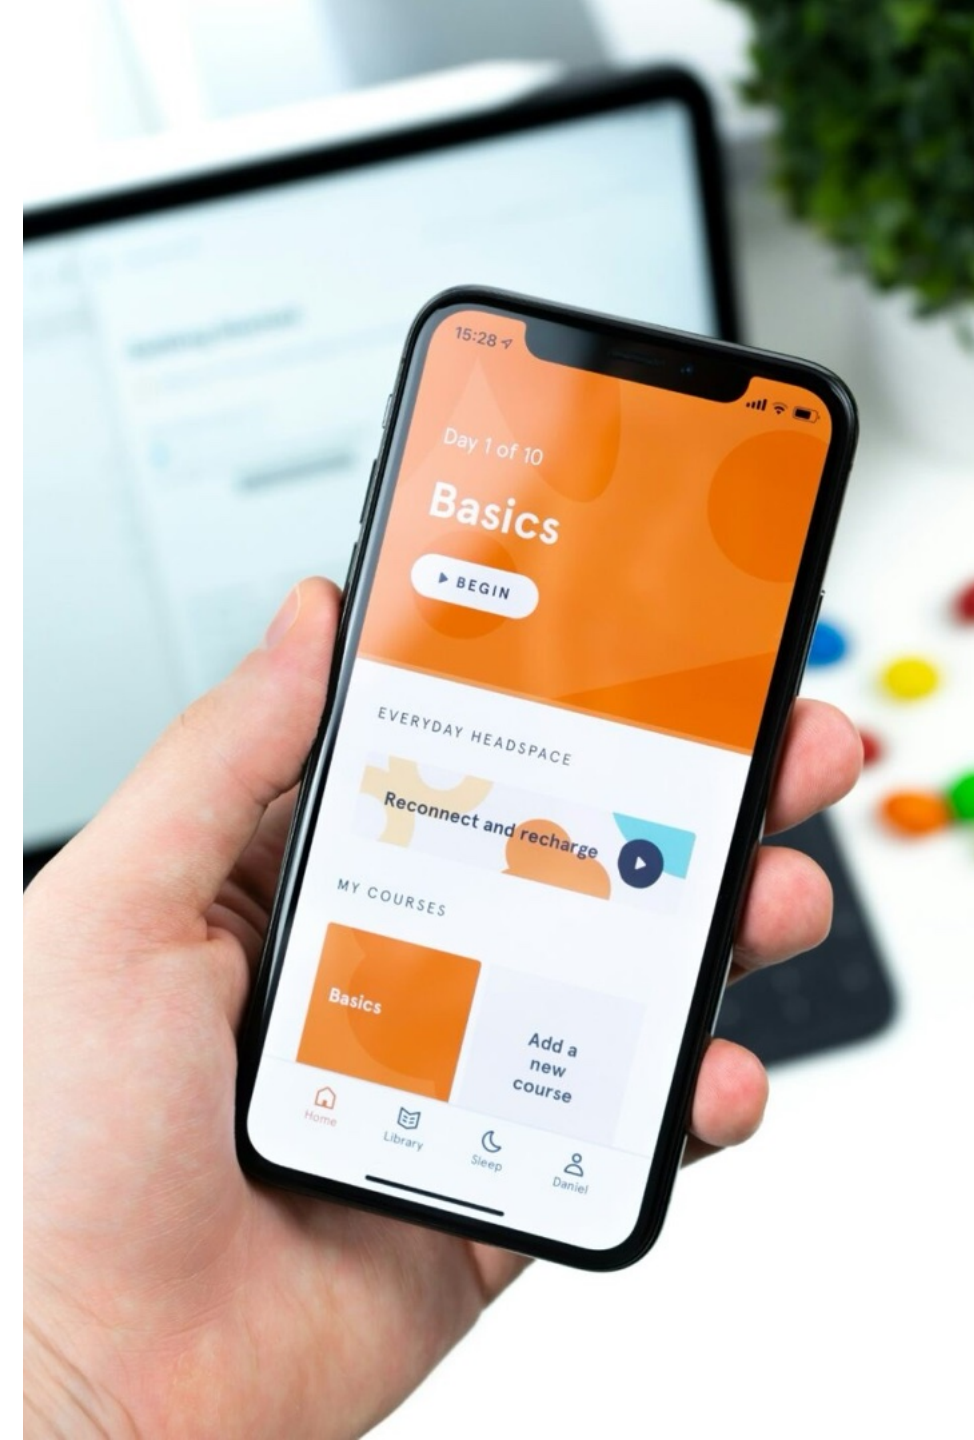

# About Us

## Who we are?

BetterGov started out as system implementation experts in Local Government and now support some of the largest Central Government Departments in delivering cloud and transformation programmes. We are user-focused, results-driven and Agile. We have experienced teams which can embed seamlessly with your existing people, deliver as a stand-alone teams or work to enhance your existing capabilities through training, coaching and mentoring.

## What do we do?

We work in the open, collaborating with client teams and 3rd parties to deliver cloud and transformational change. We often act as a Technical Delivery Partner, supporting clients to build new products and transform their services. We also deliver on fixed scope pieces of work adhering to the GDS service standards taking services from discovery through to alpha, beta, and live. We can engage flexibly through fixed-price, capped T&M, and results-based models.

# Why choose BetterGov?

## Our Experience

- Complex digital and cloud projects and programmes across Government and other large public sector organisations
- Rapid, Agile projects to make immediate impact

## Our People

- Highly experienced and qualified
- Skilled at embedding with your teams, sharing knowledge and leaving them stronger because of our engagement

## Our Commitment to Excellence

- We build lasting relationships with clients, based on demonstrable success and exceptional outcomes
- Agile, collaborative account and engagement management means we're responsive to changing needs
- Never-ending improvement, innovation and staying ahead of the curve
