Data & Digital Foundations.
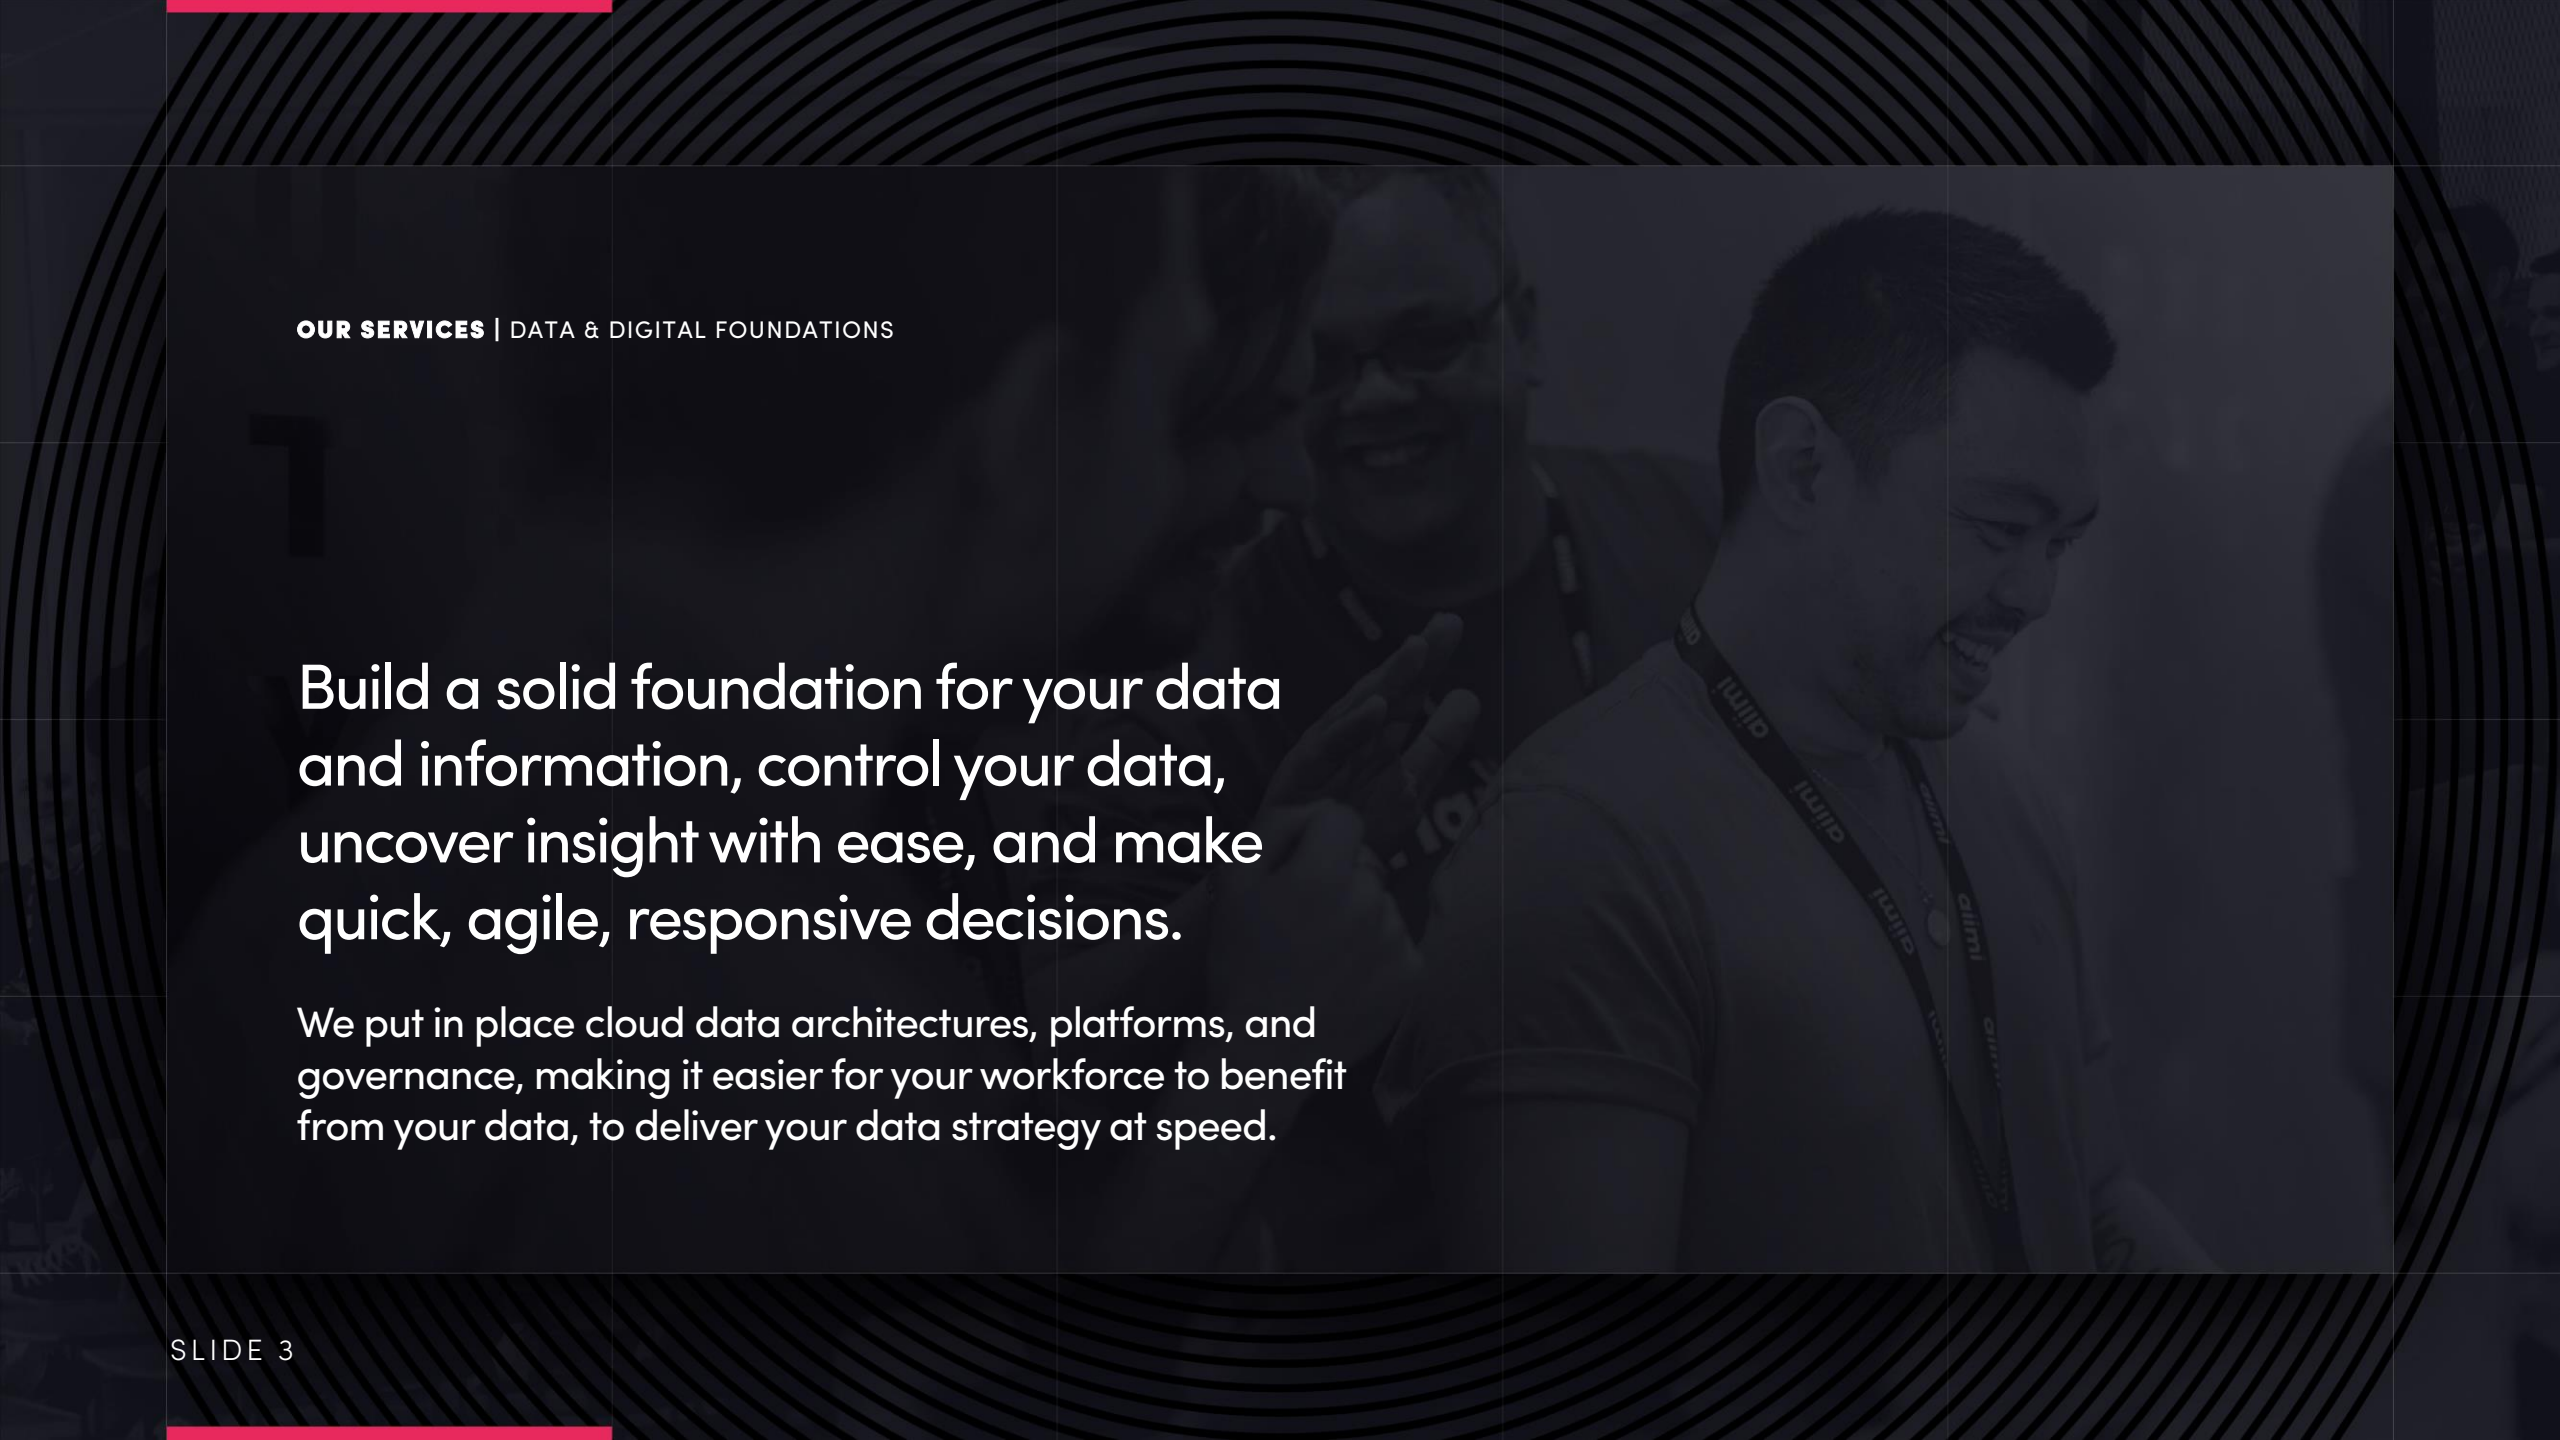

OUR SERVICES | TRANSFORM

Our Services.

Our Services put data at the heart of your digital service transformation, delivering insight that drives positive outcomes for your business.

Build a solid foundation for your data and information, control your data, uncover insight with ease, and make quick, agile, responsive decisions.

We put in place cloud data architectures, platforms, and governance, making it easier for your workforce to benefit from your data, to deliver your data strategy at speed.

We put in place data architectures, platforms, and governance, making it easier for your data analysts, data scientists, and wider workforce to explore and benefit from your data – and delivering your data strategy at speed.

By implementing new data platforms, our data foundation service will bring your data strategy and roadmap to life. If you have an existing data platform, we'll teach it some new tricks so you can achieve your data and business goals. Our technology platform architects will work with you to design logical, conceptual, and physical architectures, before in cloud or on-premises implementation.

Following an agile user-centric approach, our data architects will organise your data into data domains, subject areas, and data models. Our data engineers will work in an iterative way, building pipelines to fill your data warehouse, data lake, or data lakehouse with high-quality trusted data. These will provide your product teams with the solid foundation and confidence they need to build new data products and digital experiences for your business.

Features & Benefits.

Our expert services are designed to deliver maximum benefit with a flexible approach – here's what you can expect...

Service Features

- Turn your data strategy into a technical roadmap and implementation
- Define data domains, subject area models, and logical data models
- Cloud data platform design and implementation
- Create next-gen data lakes or extend existing enterprise data warehouses
- Integrate data from structured, semi-structured, and unstructured sources
- Build automated data pipelines, reducing data load and processing times
- Leverage Aiimi's own data discovery platform, the Aiimi Insight Engine
- Integration with leading analytical and visualisation tools like Power BI
- Productionisation platform for advanced analytics and data science models
- Provide Agile DDaT teams with T-Shaped expertise

Service Benefits

- Drive new data initiatives and provide interoperability to improve outcomes
- Maximise value of data assets through a data platform
- Set foundations for analytics, data science, machine learning, data, AI
- Enable citizen data scientists and citizen data engineers
- Build trust in your data through curated and certified datasets
- Cross-profession industry expertise and a focus on collective leadership
- Work with structured, semi-structured, and unstructured datasets
- Centralised platform for applying data governance and security
- Make accessing data easier for everyone who needs it
- Drive change towards a data-driven culture with knowledge transfer

Features & Benefits.

Our expert services are designed to deliver maximum benefit with a flexible approach – here's what you can expect...

Service Features

- Custom architecture
- Real-time analytics
- Compliance
- Cloud solutions
- Strategic integration
- Conceptual, logical, and physical architectures

Service Benefits

- Boosts efficiency
- Ensures security
- Supports scalability
- Drives innovation
- Enhances control

We are a creative tech company specialising in data and information. Our expert services and our AI and machine learning technologies deliver data and digital outcomes for real business impact.

Our Aiimi Insight Engine gives your organisation a complete overview of your data universe to reveal new relationships and unlock valuable insights.

The Aiimi Insight Engine interconnects valuable information across all enterprise systems for a comprehensive understanding of your data universe and acts as an accelerant to our services...

Our Software ⟷ Our Services

DESNZ.

At the Department for Energy Security and Net Zero (DESNZ), we built a near real-time Data Management System to quickly and securely capture and enrich a vast amount of COVID-19 business support grant and Green Homes Grant data collated from more than 300 Local Authorities. This platform enabled DESNZ to harness high-quality data, generating insights to more accurately assess the impact of schemes and support future policy decisions.
