Overview

RT Consulting deliver innovative change & transformation to the UK Government, Defence Industry, Financial Services, Rail and Utilities Sectors. Our experienced team work in partnership with you to understand your challenges, aligning ourselves with project objectives to design a cost-effective solution that ensures project success.

RT Consulting and our affiliate businesses have worked within change and transformation for over 30 years. We understand the unique risks and challenges our clients face and have developed a rigorous quality process in response.

Through our partnership approach we gain a deep understanding of your requirements, enabling us to leverage our group wide business services to create a best fit solution.

Whether you are looking for a consultancy partner to deliver a complete project, or facilitate an element of a larger project, we can support you remotely or at your chosen site depending on the required outcomes.

We have extensive experience in security, government and wider public sectors, ensuring your project and programme is safe in our hands.

We are uniquely positioned to offer consultancy packages through our extensive group structure. Our expertise spans Programme & Project Management, Commercial & Finance, Project Controls, Cost Modelling & Forecasting, Assessment & Training and a range of specialist workforce solutions.

About the Catalogue

RT Consulting's Service Catalogue is designed to outline our service offering in a number of key areas, detailing how we deploy our Society of Consultants via a range of tailored and fully flexible delivery methods. The Catalogue details our key areas of capability alongside an overview of the RT Society Associates with relevant experience.

Satisfaction · Tenacity · Client Centric · Integrity · Partnership · Delivery Focus · Transparency · Efficient

RT Consulting

The RT Society

The RT Society is RT Consulting's community of Consultants who support us in delivering to our clients. Together they form a network of professionals with specialisms spanning across the full spectrum of Programme delivery Scoping, planning and delivering to embed change and ensure our clients' business benefits are achieved.

The Society is comprised of a rich mixture of exceptionally talented professionals forging a manpower of eclectic global knowledge and experience from a range of sectors with a similar ethos and desire to add value. Comprising of ex-Military veterans and personnel, ex-Civil Servants and Private Sector background experience our Consultants bring with them unique and valuable knowledge across Defence & Intelligence, Central Government and the wider public sector, Banking and Financial Services, Transport and Utilities.

The RT Society was designed to create an open and collaborative environment where our Consultants are supported and can learn from each other; a platform for sharing regular and relevant information and content, to ensure our consultants are best placed to deliver to our clients.

Security Clearance

As an Approved Supplier of Security Cleared personnel to MOD and Government organisations, RT Consulting are accredited to carry out Security Assurance and confirm the Security Clearance status of required individuals up to and including Counter Terrorist Check (CTC), Secret Level (SC) and Developed Vetting (DV). We have access to over 5,000 Consultants currently working on secure projects.
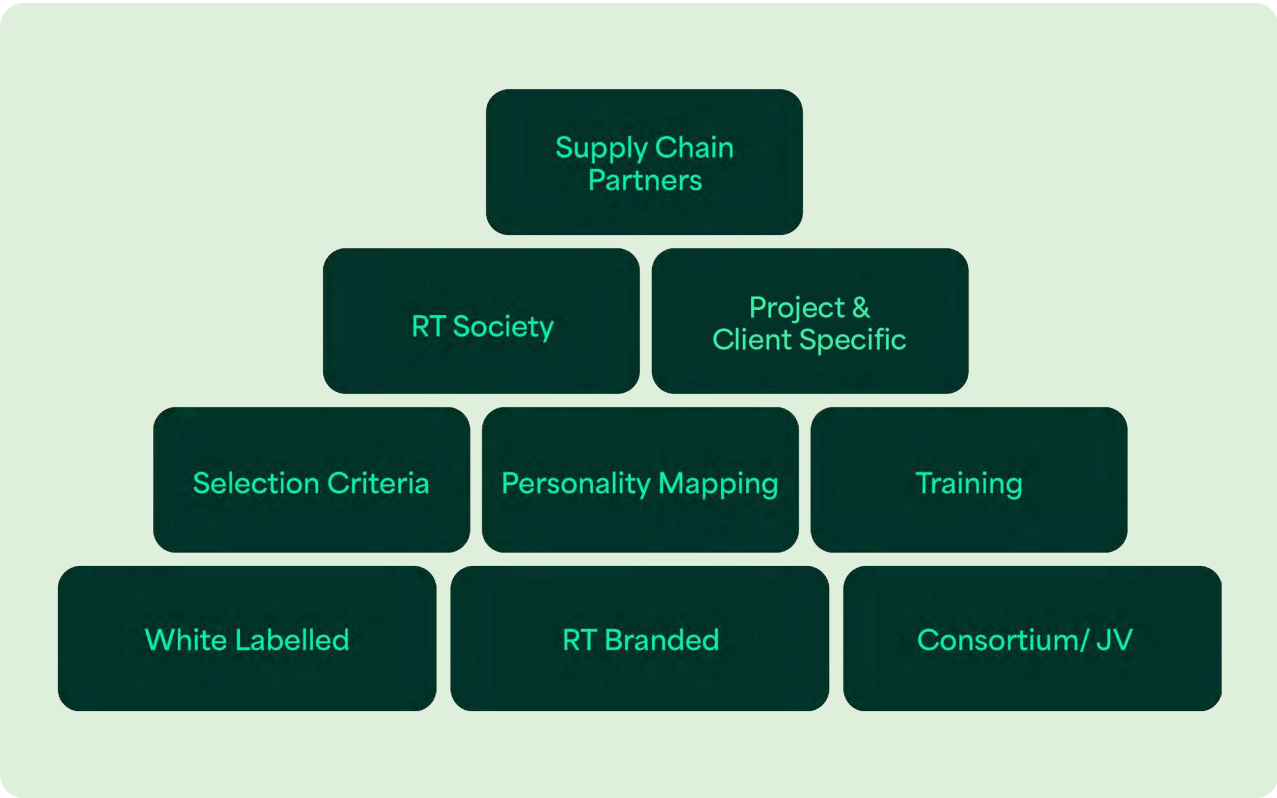

Security Clearance

- BPSS - 536
- Developed Vetting - 893
- Secret Level - 3,571

Security Clearances:

Developed Vetting (DV) – MOD
Developed Vetting (DV) – Site
Secret Vetting (SC)
Counter Terrorist Check (CTC)
Disclosure Scotland/ Basic Disclosure (BC)
Baseline Personnel Security Standard (BPSS)

Delivery Models

RT Consulting work to flexible delivery models, meaning the way we deliver our people and the way we structure our commercials can both be tailored to the individual requirements of specific programmes, projects or proposals.

Utilising a hybrid model we can provide a continuity of support through the supply chain, combining domain knowledge and skills without the added cost of interim supply.

Whether clients choose to source solely from within our Society of Consultants or engage us alongside additional suppliers, we can flex our model accordingly to ensure project delivery milestones and timescales are met.

- Supply Chain Partners
- RT Society
- Project & Client Specific
- Selection Criteria
- Personality Mapping
- Training
- White Labelled
- RT Branded
- Consortium/ JV

Fee Models

The flexibility and adaptability of our commercial model is especially helpful when partnering in consortiums and joint ventures, or as part of the ecosystem delivering programme capability.

Our ability to bend and flex commercials whilst maintaining a share in the programme's risks and rewards means we are able to deliver both utilisation and cost benefits across a programme's lifecycle, ensuring we drive outcomes and embed change whilst sharing in the success of our clients transformations.

With many years' experience working with public sector procurement techniques such as volume discounting and "risk and reward", we have developed our flexible models to fit with and alongside procurement frameworks, balancing the price points of large bids and tenders without compromising on quality.

Capability Breakdown

Change & Transformation Solutions

Driving sustainable and lasting change within client organisations by aligning to your strategy; mirroring your values and culture to ensure long-term project and programme success. Our Consultants look at the whole change lifecycle to deliver the most effective approach, ensuring your projects deadlines are met and costs are controlled every step of the way.
