- Furthering awareness and action around climate change

Added value

You only pay for the people who add value to your service

Our model (small core staff + highly experienced associates) means that we do not have people on a bench that need to be kept busy. It also means you deal with experienced practitioners not salespeople or account managers who don't fully understand what they are selling.

Our people are experienced practitioners

Our team and associates are all experienced practitioners who are used to applying their skills to projects like yours and are well equipped to help you navigate the inevitable challenges and complexities that will crop up along the way to delivering a successful new service.

You get a bespoke team, tailored to fit your needs

As our clients, you are our users. Our solution is the people we provide. We take time to understand your organisation, its culture and the skills you need before we put our team together. We are also happy to scale the team up or down as your needs change over time (e.g. whilst a specialist skill is needed for a period). This means you will always have the right people and skills and you don't pay for people you don't need.

We are agile, which means we are flexible

We tend to work in sprints and will provide a consistent core team. Skills transfer is baked in

We take pride in helping our clients develop their own staff skills in product management and user centred design. We do so through working alongside client staff, as one team, actively pairing with them and providing coaching and mentoring during delivery.

We care about outcomes, not outputs

Peter Drucker famously said "There is nothing quite so useless as doing with great efficiency that which should not be done at all". And we started Pilot Works because we were tired of delivering digital products and services that were ill conceived and did not deliver the desired outcomes. Digital is a means to an end. We only care about the end.
