

SThree Project Services

G-Cloud 14 Service Definition Document

Service Integration (SIAM) Services – SThree trading as Computer Futures & Real Public Sector

Our Project Services offering provides flexible delivery options that enable you to maximise project budgets and deliver your digital transformation portfolios at pace.

About us

SThree is a £1.2bn global UK-based PLC, with substantial experience delivering project, consulting, and contracting services to customers worldwide with a specific focus on STEM (Science, Technology, Engineering, Mathematics).

Our **Project Services** business integrates project management, technology consulting and delivery capability by leveraging the unique expertise of our **specialist Public Sector technology brands** in supporting Public Sector customers to provide cost efficient, effective and highly collaborative Cloud and Digital solutions.

Project Services

SThree works in partnership with our specialist brands to deliver Project Services

SThree has been operating in the Public Sector for **over 30 years**.

We have partnered with customers across **NHS, Central & Local Government, Higher Education, Defence, & Transport**.

Sectors we cover

Healthcare & NHS

Central Government

**Higher & Further
Education**

**Local Government &
Combined Authorities**

Transport

Bluelight

Why SThree Project Services?

We work with the public sector to help them to become the trailblazers of their sector, the industry disruptors, the game-changers in STEM. And we do that by providing the specialist skills needed to deliver their projects and drive their strategic success. We partner with businesses to help them navigate uncertainties, adapt to change, seize opportunities and **optimise value**.

Flexibility

Our range of flexible service options give you access to project delivery and expert resources you need, when you need them.

Agility

We respond rapidly to your requirements, with the ability to form project team solutions within 5-10 days of agreeing scope.

Responsibility

You can choose to transfer responsibility for project management and delivery to us, giving you peace of mind.

Transparency

Our SOW contracts give you visibility over every aspect of the delivery and progress of a project.

Cost-Effectiveness

Our services are cost-effective, allowing you to outsource internal overheads and reduce the total cost of delivering a project.

Productivity

Using our services will give you the capacity you need to deliver your technology projects successfully and on time.

Collaboration

Our collaborative approach means that you benefit from knowledge transfer as a contractual requirement.

Independence

We do not enter into alliances with specific technology vendors and will always work with you to agree on the optimum technology solution for your project.

Service Integration (SIAM) Services

SThree Project Services help clients implement their Cloud Service Integration & Management (SIAM) vision. We help our customers design their SIAM operating model, governance, and processes to operate your requirements & better manage your supplier portfolio. - Improved process governance, control, & maturity
- Embedded knowledge transfer through detailed documentation & reporting
- Ongoing service demand-planning, resource-planning, and work scheduling.

Our Service Delivery Approach

Ordering, Onboarding, & Offboarding

Enquiries

Please send your enquiries and work requirements to:

sthreegcloud@sthree.com

We will contact you to arrange a requirement confirmation meeting with our Project Services Team and as required prepare and agree a costed service quotation for you, including any applicable volume discounts.

Ordering

We will issue you with the required G-Cloud documentation and request a purchase order. Once the PO is received the services will be initiated as per our service delivery model.

Each SOW engagement / work phase will be subject to agreement with the customer. For ongoing services a stage-gate review and approval process will apply to each phase / increment of work. All SOW / work phases are subject to formal review and lessons learned sessions.

Onboarding

Services will be initiated as per our service delivery model. Specifically the service initiation phase plus project / service initiation strategy definition, resource allocation, and deployment.

On a monthly basis, we will complete the mandated management information reports to Government Procurement. Ongoing engagements are managed via individual statements of work which are governed by the framework agreement.

Offboarding

We embed knowledge transfer into our standard service levels assuring that our customers retain all required documentation and knowledge sources from initiation to service transition to BAU at the completion of each engagement, assuring business continuity.

Full project / service closure processes are included in our standard contracted service levels.

Social value

Our commitment

We want to be recognised as leaders in **diversity, inclusion and equity** within staffing, and help solve complex global issues by making **STEM industries more accessible**.

We also support **under-served communities**. In the UK, we have done this by partnering with **Generating Genius**, the **Aleto Foundation**, and provided **CV and interview support** for young people from under-served communities who are interested in a STEM career.
