Education**

**Local Government &
Combined Authorities**

Transport

Bluelight

Why SThree Project Services?

We work with the public sector to help them to become the trailblazers of their sector, the industry disruptors, the game-changers in STEM. And we do that by providing the specialist skills needed to deliver their projects and drive their strategic success. We partner with businesses to help them navigate uncertainties, adapt to change, seize opportunities and **optimise value**.

Flexibility

Our range of flexible service options give you access to project delivery and expert resources you need, when you need them.

Agility

We respond rapidly to your requirements, with the ability to form project team solutions within 5-10 days of agreeing scope.

Responsibility

You can choose to transfer responsibility for project management and delivery to us, giving you peace of mind.

Transparency

Our SOW contracts give you visibility over every aspect of the delivery and progress of a project.

Cost-Effectiveness

Our services are cost-effective, allowing you to outsource internal overheads and reduce the total cost of delivering a project.

Productivity

Using our services will give you the capacity you need to deliver your technology projects successfully and on time.

Collaboration

Our collaborative approach means that you benefit from knowledge transfer as a contractual requirement.

Independence

We do not enter into alliances with specific technology vendors and will always work with you to agree on the optimum technology solution for your project.

Higher Education Cloud Services

SThree provide cloud, digital, & transformation services to the Higher and Further Education sector, assuring student, staff, & alumni satisfaction through digital adoption & maximising Education systems such as Virtual Learning Environments (VLE), CRMs, ERPs, & Student Record systems (SRS) including SITS & Ellucian Banner, supported by Higher Education specialists.

- Cost effective and transparent pricing with a focus on Value-for-Money
- Track record of supply to Higher & Further Education
- Improved delivery against planned benefits, incremental delivery of system features

Our Service Delivery Approach

Ordering, Onboarding, & Offboarding

Enquiries

Please send your enquiries and work requirements to:

sthreegcloud@sthree.com

We will contact you to arrange a requirement confirmation meeting with our Project Services Team and as required prepare and agree a costed service quotation for you, including any applicable volume discounts.

Ordering

We will issue you with the required G-Cloud documentation and request a purchase order. Once the PO is received the services will be initiated as per our service delivery model.

Each SOW engagement / work phase will be subject to agreement with the customer. For ongoing services a stage-gate review and approval process will apply to each phase / increment of work. All SOW / work phases are subject to formal review and lessons learned sessions.

Onboarding

Services will be initiated as per our service delivery model. Specifically the service initiation phase plus project / service initiation strategy definition, resource allocation, and deployment.

On a monthly basis, we will complete the mandated management information reports to Government Procurement. Ongoing engagements are managed via individual statements of work which are governed by the framework agreement.

Offboarding

We embed knowledge transfer into our standard service levels assuring that our customers retain all required documentation and knowledge sources from initiation to service transition to BAU at the completion of each engagement, assuring business continuity.

Full project / service closure processes are included in our standard contracted service levels.

Social value

Our commitment

We want to be recognised as leaders in **diversity, inclusion and equity** within staffing, and help solve complex global issues by making **STEM industries more accessible**.

We also support **under-served communities**. In the UK, we have done this by partnering with **Generating Genius**, the **Aleto Foundation**, and provided **CV and interview support** for young people from under-served communities who are interested in a STEM career.
