

MICROSOFT 365 COPILOT

Boost productivity with Microsoft Word, Excel, PowerPoint, Teams, and Business Chat.

Unlock Productivity

Uplevel Work

Unleash Creativity

How can **WM Reply** help?

M365 Copilot is available as an add-on for M365 E3 and E5 licences. But there's more to launching Copilot than flipping a switch. **WM Reply can help you prepare for Copilot** and plan how to optimise your investment. We'll help you understand the risks around data security, develop a governance strategy and identify where Copilot will drive value for your business. Discover how to scale Copilot for your enterprise, preparing your employees to use AI effectively, setting the framework for continuous productivity improvements.

Technical Readiness and Planning:

Configure your environment, analyse data governance and security risks, develop a technical roadmap for long-term governance.

EAP Support:

We create a plan that sets you up for success with a robust discovery that includes an assessment of your environment and technical readiness to help prepare a business case and persona-specific use cases for a full Copilot rollout.

Execution of Change Strategy:

Adoption & launch strategy, campaign execution, Governance, and stakeholder and champion engagement.
