

THE VIVA ENGAGE MIGRATION TOOL

BY WM REPLY

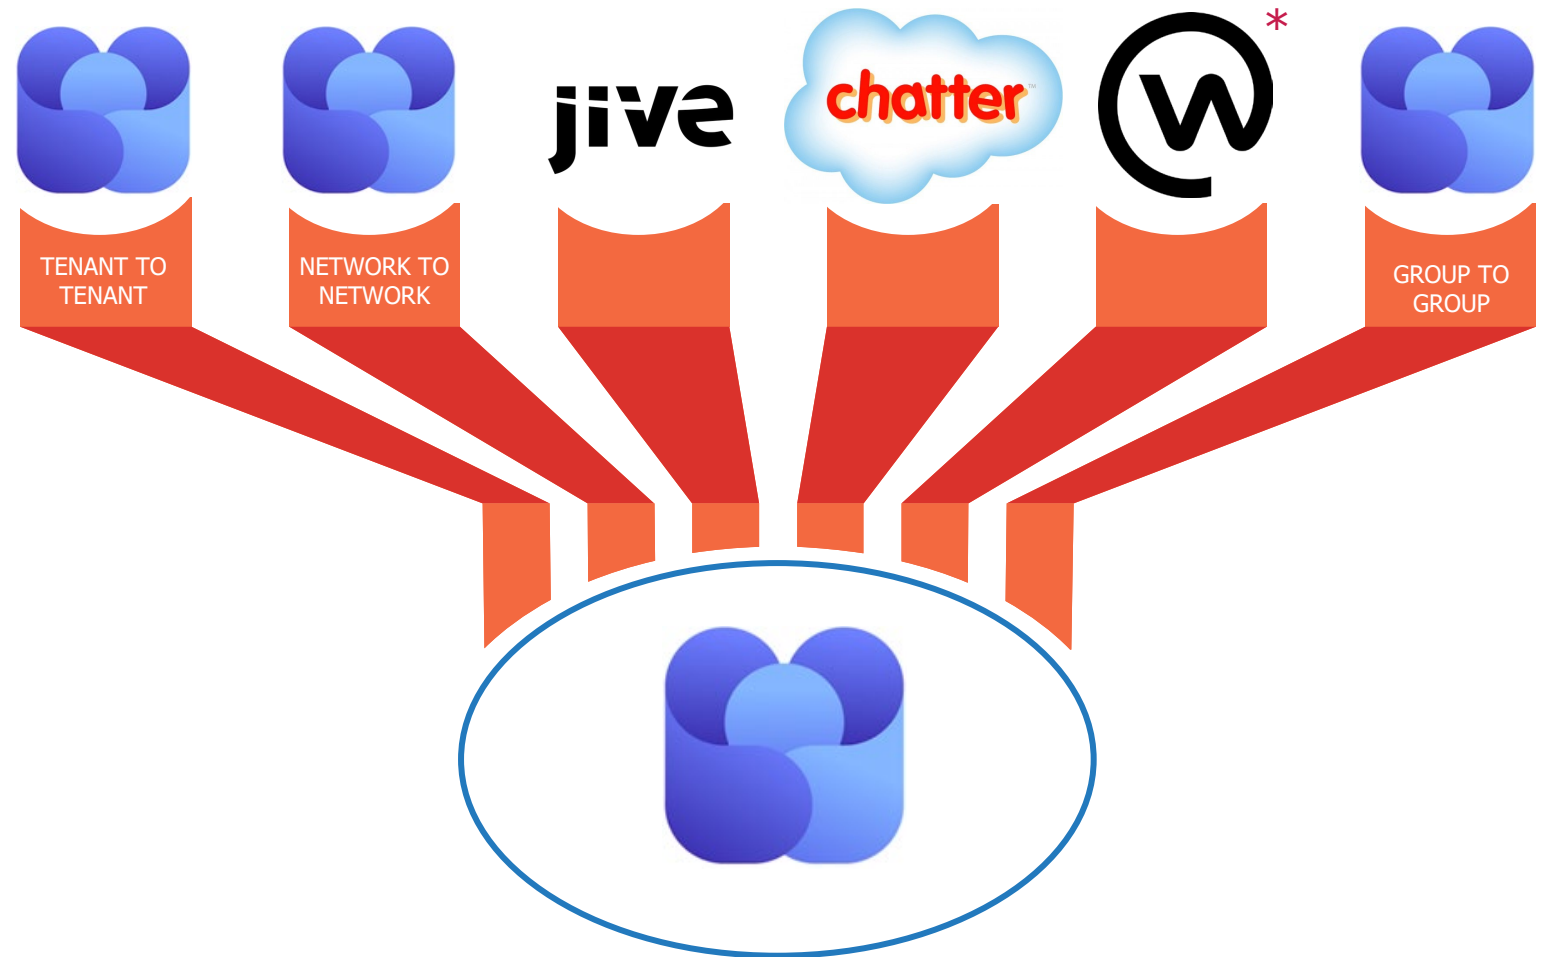

THE ENGAGE MIGRATION TOOL

WM Reply have built an in-house, Azure-based tool that can migrate from all the following data sources into Viva Engage.

The tool migrates:

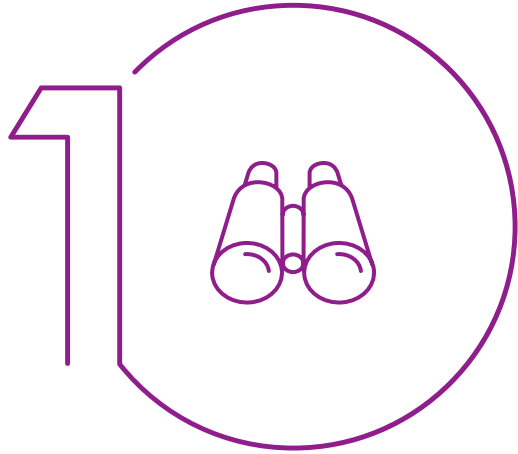

- ✓ Posts
- ✓ Replies
- ✓ Likes
- ✓ Files
- ✓ Announcements

... whilst maintaining ownership of content
in the new destination

THE PROCESS

Our tool is not an off the peg product and requires our specialist consultants to plan and execute the migration.

Discovery and Planning

First, we will...

- ✓ **Workshop** to determine the scope of the migration incl. no. of networks
- ✓ **Confirm your Engage is Native***
- ✓ Determine if you need the network to be provisioned to a new location
- ✓ If needed, **reduce the volume** to ensure an efficient migration

Proof of Concept

Then...

- ✓ Conduct a **“dry-run”** of the tool to migrate a small amount of test content
- ✓ **Test and validate** that the process works as expected on your environment

Production Migration

Then ...

- ✓ Our consultants will **run the production migration**

INDICATIVE COSTS AND TIMELINES

Discovery (required for all projects)

Required for all projects

from £12,000

Small Production Migration

(under 20,000 items)*

from £16,500
