## Subscription Costs

Number of accessible property records	Monthly Cost (£)	Notes
0 - 1,000 units	1,250	A price per property is calculated for the first 1000 properties.
1,000 - 4,000 units	2,500	A price per property is calculated for properties between 1,000 and 4,000 properties.
4,000 - 16,000 units	3,750	A price per property is calculated for properties between 4,000 and 16,000 properties.
more than 20,000 units	5,000	A price per property is calculated for properties over 20,000 properties.  Volume based discounts apply on top (see notes).

---

## How does pricing work?

### If you are a single Local Authority or Housing Association:

- Pay per access to property records as per the table above. Progressive bands per property numbers apply.
- Discounts apply on bands for large number of properties:
  - >15,000 properties: 37.917%
  - >30,000 properties: 50%

### If you are a combined authorities or consortium:

- Pay per access to property record as per the table above for all onboarded authorities (as if they were onboarded separately)
- Pay per access to property as per the table above for the CA or consortium leader's own access to all properties of all LAs (sum of all LA properties). Progressive bands for property numbers apply to both.
- Discounts apply on bands for large number of properties
  - >15000 properties: 37.917%.
  - >30,000 properties: 50%
  - This applies on both the LA licenses (again per property) and their own licence (the sum of all properties).

---

## Additional Professional Services
