

Certa Testing

Finding Confidence in an Uncertain World

User Acceptance Testing (UAT)

For Confident and enabled Users

Service options range from advice and consultation to a fully managed service. Our UAT services provide an essential, dependable and quickly deployable solution to gain confidence that end-to-end business processes and business requirements are fulfilled and fully tested.

UAT Service Features

Planning:

Understanding business needs, creating the appropriate test approach and scheduling associated test activities.

Risk based testing:

Applying priority planning to test coverage based on risk analysis.

Test Resources:

Providing experienced UAT specialists for Applications and Infrastructure testing with appropriate security clearance.

Coverage Analysis:

Providing reliable traceability to requirements and outcomes.

Specification and Execution:

Creating and executing UAT scripts, evidence capture and management of quality gates.

Test Environment:

Managing the setup of controlled, reliable, and flexible test environments that are representative of production.

Defect Management:

Provision, configuration and maintenance of a defect management system. Creation of the defect management process for use throughout the entire UAT process.

Progress Report and Control:

Summarising testing activities, results and progress to the management stakeholders.
Reprioritisation of activities to align with the planned schedule

About Certa Testing

Our testing services are designed to help you reduce risk and delivery cost to your organisation. Software quality assurance and testing activities are planned in accordance with your organisation's specific business needs. Our testing services are offered individually or can be packaged into customised solutions to solve your business challenges or address particular issues. Certa Testing is a supplier on the Digital Marketplace. Services are available on the Crown Commercial Service.
