Cloud Training

Overview of Service

Modernising your applications means embracing new cloud services and technologies - and there's lots of them! It can also involve new ways of working, and a shift in responsibilities across teams.

Upskilling your team is vital for successful cloud adoption and maximising business value.

Immersion Days are a great way to upskill your team on specific AWS technologies - for example, Serverless or Containers. Our Immersion Day workshops will leave you with the confidence to develop and innovate.

Immersion days allow your teams to deep dive into AWS services with the support of Cloudsoft's certified AWS solutions architects. As an AWS Advanced Consulting Partner we'll ensure that you'll get the AWS knowledge you need, with advice on how to contextualise this for your IT environment.

Two Cloudsoft Principal consultants will deliver a 1-day workshop for an immersion day, covering a particular aspect of AWS. It will contain a mix of instructor led material, lab based training, Q&A and discussions. Example agendas include:

Containers

- a. Introduction to containers and Docker
- b. Amazon ECR
- c. Amazon ECS and AWS Fargate
- d. Amazon EKS

Serverless

- e. Overview of Serverless on AWS
- f. Event-Driven Architectures
- g. Developing and Deploying Serverless Applications
- h. Serverless Security
- i. Serverless Architecture Patterns

Pricing Models and Pricing
