

Agile product owner

Service  
definition

# Agile product owner

The product owner is the bridge between the business and the project team.

We provide experienced product owners who can grasp the requirements of a new project or domain rapidly and advocate effectively for the customer.

## Core features

- Owning and communicating project vision to full range of stakeholders
- Developing and managing complex product backlog through development and delivery
- Early return on investment by identifying opportunities to add value fast
- Extensive experience of Discovery, Alpha and Beta
- Experienced in local and national healthcare system implementation

## Benefits

- Deliver rapid decision-making through persuasive and clear communication.
- Decisions prioritised based on deep understanding of Agile lifecycle.
- Stakeholders empowered and supported by skilled product owner
- Stakeholders supported through Agile adoption

## Our approach

We will work with you to understand how we can support the adoption of Agile within your organisation, empowering your staff to take over the pivotal role of product owner.

We can rapidly build and help to prioritise a product backlog for your project, developing a roadmap and identifying opportunities to add value fast. We can help to develop business cases to secure funding for the next phase of development and move beyond the build phase into implementation, training and support.
