SharePoint Services

Influential Software offer a full range of SharePoint services; from design & build through upgrade and migration from legacy deployments.

Influential specialise in making optimal solutions, based upon out-of-the-box features where possible and associated technologies within the 365 eco-system.

We offer a full managed service, hybrid, or client led delivery modes. In each case, the right mode can be facilitated from our expert, multi-disciplinary team.

For common deployments (such as Intranet realisation), we have packaged offerings. For bespoke installations, we have a transparent rate card according to the roles required.

Introduction

This section contains details of our packaged offerings and standard rate card for bespoke project deployments.
