Service Pricing

Introduction to our standard rate card

This pricing document accompanies the service description in which it is referenced.

This service is offered based on the unit of Resource-Day based upon our published Skills For the Information Age (SFIA) rate card below. The definition of the SFIA levels has also been included.

We will work with you to estimate the effort for your requirement and calculate the number of Resource-Day units and overall price.

Where the level of effort and number of resource-days exceeds the stated volume thresholds, and where pricing is calculated based on resource-days, we are pleased to offer volume discounts as described below.

Value for money

As a supplier of Cloud services to Central government, we understand the importance of demonstrating the value we offer. Tetra Tech provides value for money by providing sensible planning for all engagements that allow us to achieve a balance of price and quality.

We seek to provide the outcomes the client requires at the lowest price we can offer, using early stage planning and discovery exercises to ensure requirements and solutions are correct first time round.

Invoicing process

We will invoice you monthly in arrears based on the days worked in that calendar month unless overriding service or commercial documentation underwrites a separate T&C. Our invoices will be payable within 30 days.
