

Face to face Testing Services

Why use this service

The coronavirus (COVID-19) outbreak has created challenges for user testing. We have a responsibility to ensure the safety of participants and ourselves. We have extensive experience in conducting face to face user research ensuring it is safe by following the COVID-19 guidelines by carrying out risk assessment.

Our highly skilled user researchers ensure they carry out successful research session with variety of user groups including those with low digital skills, use assistive technology, have disability etc.

User research provides the basis and strategy for the design process of any project. Researching/testing with real users provides explicit understanding of users, tasks, and environments. The process involves users throughout the design and development process.

When designing services, we always start by learning about the people (users) who will use it. If we do not understand who they are or what they need from the service, we cannot build the right thing for our intended users.

User Research activities

Creatively Digital Ltd, 71-75 Shelton Street, Covent Garden, London, WC2H 9JQ
www.creativelydigital.co.uk | Company Number: 11207082 | VAT NO: GB 290800118

The User research activities we carry out vary on the type of goal the service is trying to achieve. These activities could be one or a combination of the following:

- ethnography research
- desk research
- 1-2-1 interviews
- focus groups
- co-creation workshops
- stakeholder interviews
- journey mapping workshops
- user testing
- user persona building

When to use this service

To ensure that your organisation and its services meet your users needs, it's important to conduct user research throughout the life of a service, for example:

During; Discovery, Alpha, Beta and Live phases of your projects.
