Agile Cloud Business Change Leadership and Management Support

Company Overview

AHLC Solutions is a Private Limited Company that was founded by its current owner managers. Since our inception in 2017, we have carved out a reputation as a trusted Agile Cloud Business Change and Leadership company.

What we do

What is the main barrier to embracing the Cloud? Supporting your staff and customers to understand what will change and how. We will work with you to create the story about change, to take your people on the journey to ensure that moving to the Cloud is a success.

AHLC Solutions helps organisations really understand how to use cloud technology to be better at what they do.

We combine change management talent with specific expertise in health and public sector to bring a deeper understanding of our customers' challenges and opportunities. At our core is years of experience that enables us to lead in a uniquely collaborative and incremental approach to creating the best outcome for our customers.

Public Sector Experience

We have worked extensively with public sector organisations, including National, Regional and local NHS organisations. Our standing as a trusted provider of solutions to the Public Sector is demonstrated by our selection for the G-Cloud Framework and the Digital Outcomes and Specialist Services Framework.

How we do it

Our agile change management methodology and tools deliver a subtle yet effective client centred approach to ensuring change is managed as smoothly as possible.

Services Definition

AHLC Solutions has twenty years of experience of providing Business Change, Programme and Project Management services:

Approach

- Consultation - AHLC Solutions will consult with all key stakeholders to define the scope of the cloud project, agree budgets and drive all stages of the project. AHLC Solutions adhere to the budget and the timeline for each project.

- Project Initiation - The definition and agreement of the following contents (where relevant), which may or may not be defined in a Project Initiation Document (PID):
 - Project objectives
 - Project scope
 - Defined method of approach
 - Project deliverables and/or desired outcomes
 - Exclusions
 - Constraints
 - Interfaces
 - Assumptions
 - Project organisation structure covering project management team structure and governance arrangements
 - Communication plan
 - Project quality plan
 - Project controls
 - Initial risk log
 - Initial project plan
- Planning the Project - After the initiation stage, the project is planned to an appropriate level of detail. The main purpose is to plan time, cost and resources adequately to estimate the work needed and to effectively manage risk during project execution.
- Project Execution - involves coordinating people and resources, as well as integrating and performing the activities of the project in accordance with the project management plan.
- Monitoring and Controlling the Project – observation of the project execution so that potential problems can be identified in a timely manner and corrective action can be taken, when necessary, to control the execution of the project.
- Project Closure – Closure includes the formal acceptance of the project and the ending thereof. Administrative activities include the archiving of the files and documenting lessons learned.
