Our experts are skilled across a wide range of ICT Infrastructure including; Datacentre, Hosting, Cloud, Storage and Network security.

ADVICE AND GUIDANCE ON STRATEGY FOR CLOUD MIGRATION

DEVELOPING PROJECT KICK-OFF & LIFECYCLE

**DEPLOY, INSTALL & IN-SERVICE SUPPORT**

Cloud Application Development

Trusted Technology Partnership offers development services allowing our clients to fully realise the benefits of Cloud, Mobile and IoT. Using technology to reduce cost, improve efficiency and maximise security.

Our full-stack development team can design, develop, migrate and support cloud-based solutions. Multi-platform expertise, including iOS, Android, Office365, Azure, and Java technologies

- ✓ Develop and integrate existing platforms

- ✓ Improve efficiency

- ✓ Accelerate innovation and collaboration
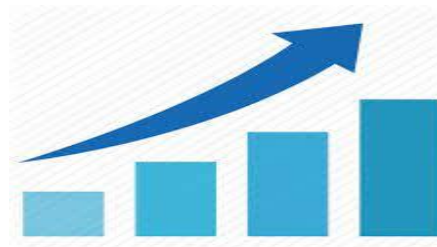

Office 365 & Microsoft Cloud

Trusted Technology Partnership offer planning, mobilisation and management of full spectrum of Office365 / Microsoft365 services. Following industry and vendor best practices throughout the project to ensure a secure, efficient and value for money service. Through engagement with an experienced IT partner, clients will realise the ROI of any Office365 / Microsoft365 service.

- ✓ Teamwork and communication
- ✓ Web and mobile versions of Office apps
- ✓ Email and calendaring
- ✓ Security and compliance
- ✓ Support and deployment
- ✓ File storage and sharing
- ✓ Advanced threat protection

Microsoft N365

Tailored for NHS clients seeking to implement or maximise value from N365.

Leveraging our extensive experience supporting the NHS for 20+ years, clients can access our experienced project, service management and technical teams with a proven track-record of successful delivery.

- ✓ Data migration from on-premises servers to OneDrive, SharePoint and Teams.

- ✓ Implementation of TANSync, EM&S, Intune, Autopilot, Conditional Access and BYOD.

- ✓ Full range of complementary app or software development services available

- ✓ NHS Data Security and Protection Toolkit compliant supplier

- ✓ Nationally accredited ITIL service desk, providing 24x7x365 support.

# Software-Defined Edge & Infrastructure Security

Leveraging Fortinet technology to provide Software-Defined Wide Area Networking (SD-WAN) and Software Defined Networking (SDN) with security functionality, Healthcare Computing offers a complete managed solution including;

- ✓ Unified Threat Management (UTM)
- ✓ Sandboxing
- ✓ Email Security
- ✓ Machine Learning

Cyber Security Improvement

Trusted Technology Partnership offer planning, mobilisation and management of cyber security transformation and improvement programmes. Our experienced team helps clients deliver the application and realisation of a robust cloud and cyber security strategy.

Through engagement, clients will realise the benefits of developing effective governance structures, processes and toolsets, improving cyber security posture and response.

CONSULT → **DESIGN** → **DEPLOY** → **SUPPORT**
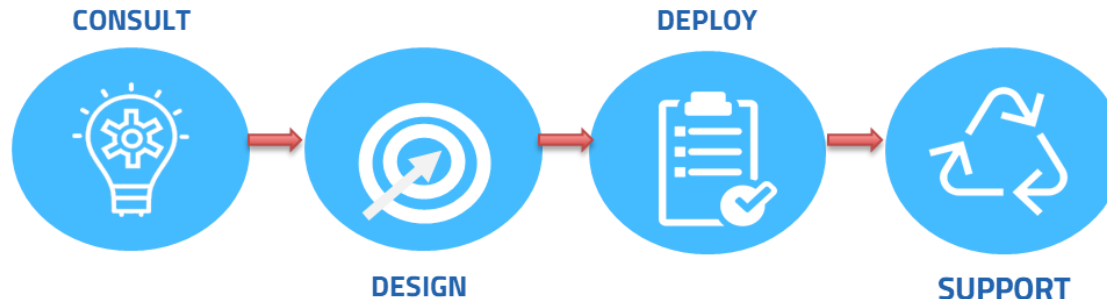

Managed Security Services

Trusted Technology Partnership provide fully managed security services, combining technology, people, and process to deliver effective solutions to monitor cyber activity and maintain an organisations cyber-posture.

Our Security Operation Centre (SOC) can provide customised protection to suit your business need and reduce the risk of security incidents. Benefit from the support of our nationally accredited, ITIL service desk.

- ✓ Support SIEM and SOAR technologies
- ✓ Cyber Essentials Plus & Protection Toolkit compliant supplier
- ✓ Nationally accredited service desk – 24x7x365 support available

Security Information Event Management & Automated Response

Leveraging Fortinet's FortiSIEM and FortiSOAR products, Trusted Technology Partnership offers a complete managed service for Protective Monitoring and Automated Remediation.

Our solution offer clients a deep multivendor integration for configuration, change management, log collection & correlation, and Indicators of Compromise to detect and contextualise threats in real-time.

Automated remediation through playbooks provides a seamless mitigation capability to security teams.

- ✓ Threat detection and management

- ✓ Incident response

- ✓ Security automation

- ✓ Increased protection

- ✓ Reduced risk

Email Protection for Exchange & Hosted Environments

TTP managed e-mail protection is a cloud IaaS VM or SaaS based service, leveraging the FortiMail platform, which delivers a security solution for on-premise and hosted email such as Office 365.

Our managed solution offers Antispam & Virus, Virus Outbreak Protection, DLP, Identity Based Encryption, and Archiving. Advanced service includes Sandbox, CDR, URL Click Protection and Business Email Compromise protection.

- ✓ Public and private Cloud support

- ✓ Various deployment methods (Server, Transparent, Gateway, Office365 API)

- ✓ Integrated DLP protections and email encryption capability

- ✓ Experienced NSE certified team

- ✓ Independently validated (VBSpam, VB100, NSS Labs)

Azure Migration and Support

Planning, mobilisation and management of full spectrum of Microsoft Cloud and Azure services.

Our consultants are skilled at migrating both users and on-premises systems to Microsoft cloud services. Realise the ROI of any Microsoft Azure service.

Optionally benefit from the support of our nationally accredited, ITIL service desk..

- ✓ Implemented SDN, Network Virtual Appliances, VPN's, Load Balancer, NSG

- ✓ EM&S, Intune, Autopilot, Conditional Access, BYOD

- ✓ Business Case production and assistance using practitioner option analysis

- ✓ Cyber Essentials Plus compliant

- ✓ Decrease cost & Increase availability through outsourced infrastructure

Cloud App Security

Leveraging SonicWall CAS connects to your G Suite or Office 365 environment via API and scans for threats after Google default filters. It deploys instantly with the only one-click, cloud-enabled platform with no need for a proxy, appliance or endpoint agent.

Transition from on-premise applications to cloud with seamless security

✓ Complete, in-depth security for Office 365

✓ Endpoint protection and web content filtering

✓ Quarantine threats

✓ Prevent malware

Virtual Firewall

SonicWall Virtual Firewall, NSv, delivers enterprise class security with streamlined management, complete

visibility, flexible deployment, while delivering superior performance for virtual workloads. Support across private and public cloud (AWS, Azure). NSv firewall series help security teams reduce security risks and vulnerabilities, which can cause serious disruption to business-critical services and operations.

- ✓ Next-gen firewall

- ✓ Complete end-to-end visibility and streamlined management with Unified Policy.

- ✓ Automated real-time breach detection and prevention capabilities.

- ✓ Patent-pending Real-Time Deep Memory Inspection (RTDMI) technology.

- ✓ Patented Reassembly-Free Deep Packet Inspection (RFDPI) technology.

- ✓ Application intelligence and control.
