

SECURITY ESSENTIALS

POWERED BY **RAPID7**

TIME TO KNOW YOU'RE SECURE

The PenteseC Security Essentials Service utilises elements of Security Information and Event Management (SIEM) and Endpoint Detection and Visibility to offer deeper insight into the threats you face, alert you to risks in your environment and provide immediate value to your organisation.

Built by experts, Security Essentials provides instant visibility of your users, devices and attackers.

Our team can monitor your network activity and alert you immediately whenever there is a risk that needs your attention - leaving you to focus on everything else that matters to your business.

Why choose our Security Essentials service?

Security Essentials provides immediate access to:

 **USER BEHAVIOUR ANALYTICS**

Identify suspicious behaviour within your digital environment and prevent damage before it occurs.

 **FILE INTEGRITY MONITORING**

Stop unauthorised or malicious changes to critical files.

Try Security Essentials today

We can set up an instant trial of the service on your network, showing real time data that is unique to your environment.

 **END POINT DETECTION AND VISIBILITY**

Be certain your devices aren't at risk from malicious activity.

 **ATTACKER BEHAVIOUR ANALYTICS**

See where attackers can hurt you most and quickly detect security events with Network Traffic Analysis.

 **DECEPTION TECHNOLOGY**

Trick your attackers with fake network resources that, if touched, alarm you to their presence.

The business benefits

The Security Essentials service is designed to give you the security outcomes you want for your organisation, including:

ENHANCED VISIBILITY

We combine **intelligent automation** and cutting-edge technology with proactive analysis from our world-class SOC analysts to offer better visibility of your digital environment.

INDUSTRY LEADING TIME-TO-VALUE

Our solution is deployed within hours and **immediately** starts analysing your environment for suspicious behaviour.

INCREASED SECURITY, LOWER RISK

Our **hypervigilant** approach can preempt disruptive events before they occur, spot potential vulnerabilities and provide a fast, dynamic analysis of threats.

COMPLETE CYBER-PROTECTION THROUGH A PERFECT SYNERGY OF INTELLIGENT AUTOMATION AND HUMAN EXPERTISE.

Cyber-security is an ever evolving and expanding challenge. When outdated solutions leave you open to risk, it's time for a new approach.

Designed to provide next-level agility, our services can be perfectly attuned to your systems and processes, however complex. We combine deep, up-to-the-second insight with intelligent automation - enabling our analysts to focus on responding to threats and providing the most complete protection possible.

ALSO COMPATIBLE WITH SECURITY ESSENTIALS

Managed Detection and Response (MDR)

Provided via our SOC, PenteseC's Managed Detection and Response (MDR) service combines multiple industry-leading technologies with 24/7 oversight from our experienced team to provide enhanced visibility, protection and the ability to respond to security incidents before they become threats.

MDR is our most comprehensive cyber-security service - giving you real-time, continuous monitoring and proactive threat prevention across your entire estate and every endpoint.

Using state of the art automation technology, our agile solution can interact seamlessly with telemetry from your organisation's other security systems to enhance visibility of potential threats and compromises.

WE FOCUS ON SECURITY OUTCOMES AND HOW WE CAN HELP YOU ACHIEVE MORE.

We align our services to your goals, give you access to our world class team of analysts and reduce the risks to your business by providing extensive threat visibility, accelerated incident response and maximum protection from evolving threats.
