Microsoft Defender as a Service

- Pentesec's DaaS provides seamless protection across your endpoints, identities, Microsoft 365, email and SaaS apps.

- Our UK-based Security Operations Centre (SOC) leverages automation to rapidly identify and remediate threats, investigate and respond to sophisticated attacks, and deliver a proactive security service to ensure your cloud environment remains protected.

- Pricing listed here is for guide purposes only and customers would be urged to reach out to sales@pentesec.com to enquire about receiving a formal G Cloud price.

- Our service can be purchased as vulnerability management, manage detect and respond or both.

- Purchases can include advisory workshops, attack simulation, SIEM Data ingestion and additional services that would need to be quoted on a case-by-case basis.

- 500 users has been used as a guide, but on receipt of your precise number of assets we would put together a bespoke pricing that scales to deliver savings.

Item	Guide Price
VM Service Only – 500 Assets	£52 per Asset
MDR Service Only – 500 Assets	£50 per Asset
Professional Services – 2 Hours	£300 per unit
