PARICO

G-Cloud 14: Service Definition Document

# Secure Application Rationalisation and Modernisation Service

Parico's secure application rationalisation and modernisation service to support customers in transitioning and transforming business applications and data. Our service includes end-to-end application assessment, readiness review, remediation and transition/transformation to exploit cloud hosting and cloud services.

FEATURES

- Establish current user-base, application-usage, dormant applications, infrastructure platform and environment
- Rationalise applications portfolio and develop strategy to cloud ready applications
- Modernise outdated applications using various development languages and frameworks
- Undertake refactoring and re-development of operational applications
- Applications developed with Cloud-Readiness at the heart of the architecture
- Decomposition of large, bulky legacy applications into individual microservices
- Experience of integrating military cloud applications
- Adoption of "fail-fast, fail-early" mindset to develop enterprise-ready, production code
- Untangle technical complexity to simplify application architecture
- Application rationalisation for applications operating from OFFICIAL(SENSITIVE) through to Above-Secret

BENEFITS

- Rapid development and deployment for delivery of new applications
- Customers have a clear understanding of each Legacy Application's functionality
- Formulate innovative solutions to re-energise legacy applications, systems and platforms
- Excellent understanding of army, navy and air force deployed applications
- Reduced security and compliance risk through adoption of Secure-by-design principles
- Agile approach provides benefit through early and incremental application releases
- Regular stakeholder engagement 'show and tell' sessions reinforces customer confidence
- Reduce Technical Debt and Operational Risk associated with business applications
- Follows Government Service Design Manual standards and methodologies
- Provision of Security Cleared (SC/DV) cloud software architects and developers

Established in early 2018, our primary goal at Parico is to develop a positive reputation across the defence sector, as a UK SME Technology Disruptor within Public and Private Sector organisations.

At Parico, we're incredibly passionate about our people and encourage the development and growth of our engineering community. Every Parico Rockstar has the freedoms to innovate and develop the next generation of disruptive products and services for our customers.

As an SME, we're able to respond to our customers requests quickly and efficiently, embracing Agile working practices across our entire organisation.
