CHR Solutions

Experts in capability-driven transformation

G-Cloud 14 Service Description

Cloud Service

About CHR Solutions

A team of experts trusted by government and public sector

CHR Solutions brings together highly recognised digital capability experts from UK government, local government, and the public sector offering a wealth of expertise right across our range of services and solutions, and an extensive track record of solving the capability challenge at the heart of large-scale transformation programmes

This depth of experience gives us the confidence and agility to tackle even the most intricate assignments, adapting to evolving needs and delivering optimal outcomes for our clients, acting as critical friends and deploying our programmes and interventions in a flexible and integrated fashion

What we do

As the expert in capability-driven transformation, we deploy a range of integrated bespoke product and services across the full **attraction, development and retention capability cycle**
Digital Academy	Talent Management	Communities of Practice	Communications and CX	Technology Solutions	Programme Support
Leadership Development	Talent Acquisition	Internal Development and Support	Employer Brand	Technology Strategy	Service Design
Training Programmes	Assessments	Knowledge Sharing	Customer Experience Marketing	Technology Build	User Research
Contextual Coaching	Workforce Data	Employee Retention	Communications & Engagement	Technology Support	Advisory Services
Our integrated approach

We design and deliver integrated solutions tailored to user needs, from strategy to technology, and cultivate the values and capabilities necessary to create agile organisations that deliver value to citizens now and in the future.

How we add value to our customers

We help public sector organisations attract, nurture, and retain the best talent, while delivering cost-effective solutions that prioritise citizen-focused services

We focus on bridging the skills gap in digital public services by providing responsive and effective skills development, career progression, and digital transformation solutions

Our unique expertise and long-standing experience of capability-driven transformation provides organisations with tailored solutions to address challenges

Cloud Service

Service definition

Our comprehensive Cloud Service offering supports central and local government organisations, and the wider public sector with the provision of cloud based strategic advisory and programme delivery to build long term or short–term project based capability, with sustainable value.

Our holistic, scalable and bespoke approach supports your organisation through every stage of the employee lifecycle, and tailored to your organisational needs and value proposition for your users.

Features

- Cloud service integration and management
- Cloud information management and digital continuity services
- Project management and governance
- Service management
- Alignment with organisation and industry specific frameworks
- Alignment with the Government Digital and Data Profession Capability Framework

Benefits

- Understand context and intent
- Understand capability challenges
- Understand the current pain points
- Reduction in staffing costs
- Risk reduction
- Ongoing and growing needs are being addressed sustainably
- Improve digital, data and technology staff skills and align with business needs

Selection of our customers

To date a substantial number of UK government departments and public sector organisations, have trusted us to solve their capability challenges and maximise opportunities
