

LINEAL SOFTWARE SOLUTIONS LIMITED

PROFESSIONAL SERVICES FEES

ABOUT PROFESSIONAL SERVICES

Lineal typically engages with clients on a contract basis whereby a level of support is agreed and provided based on a consistent and regular payment during the contract term. The level of support may be varied during the term, e.g. additional services can be added, or user counts changed but the term and service description remains the same.

For ad hoc professional services and project work, please refer to the following fee structure which gives an indication of typical fees associated with various activities. Discounts may be available for bulk ordering “call-off” contracts or for existing customers. All prices exclude VAT.
