Pricing Document

2024

The Curve provides competitively priced and high quality solutions to their clients - we operate a flexible, open-book pricing structure based on mutually beneficial commercial partnerships.

All our services are available on a simple menu basis, so depending on the make-up of a particular service solution, volume and combination discounts are encouraged and available on a case-by-case basis.

Services that include our standard templates, models, and methodologies do not incur any additional costs associated with their use. Any required use of third party tooling will be pre-agreed and charged at the prevailing supplier rate.

Our standard resource based price structures are as listed on our SFIA submission, but can be summarised as:

Standard rate	Assignment duration up to 12 weeks
5% discount	Assignment weeks 13 – 26 weeks
10% discount	Assignment weeks 27 - 52 weeks
15 % discount	Assignment weeks 52 onward

Standard Rates

We are happy to discuss Unit and User based pricing against all services offered.
