

Tableau: Business Ready

What is this training?

Embark on a comprehensive three-day journey to get business ready with Tableau. We would also recommend an extra day follow up. This can be arranged after purchase.

Day 1:

- Begin with an exploration of Data Visualization and Tableau's role.
- Understand the full capabilities of the Tableau software suite.
- Dive into Tableau Desktop fundamentals, covering core concepts like interface navigation, data types, and dates.
- Explore advanced techniques such as Groups, Calculations, Parameters, Sets, and an introduction to Table Calculations and Level of Detail expressions.

Day 2:

- Recap Day 1's learnings with interactive exercises.
- Delve into understanding data sources, including cleaning, shaping, and relating data using Tableau Desktop.
- Master working with multiple data sources, extracts, data refreshes, and the distinctions between cloud and server-based solutions.
- Get hands-on experience with Tableau Prep, learning when and how to use it effectively for data preparation.

Day 3:

- Refresh your memory with a recap of Day 2.
- Gain insights into creating effective dashboards, understanding their purpose, audience considerations, and interactive elements.
- Explore Tableau Cloud and Server functionalities, including publishing dashboards, managing permissions, and utilizing subscriptions and alerts.
- Discover the power of Pulse for real-time data monitoring and notifications.

Join us for an enriching workshop experience where you'll acquire practical skills and knowledge to leverage Tableau effectively in your data analysis and visualisation endeavours for your business.
