

## **PRICING DOCUMENT FOR CLOUD SUPPORT SERVICES (G-Cloud 14)**

Emu Analytics offer consultancy-based cloud support services in parallel to their cloud-based software solutions. The offered consultancy relates to activities directly related to client specific needs and operations of Emu's software offerings, in areas that include (but are not limited to):

- Solution implementation
- Solution adaptation
- Solution bespoke feature developments
- Solution hosting and operation
- Solution training
- Data integration
- Data persistence
- Data analysis
- GIS consultancy

Emu's small team consists of a mix of senior technologists (for example, 20 year+ professional experience in technology delivery roles), senior business consultants (senior management / C Level background, with previous experience in firms such as KPMG, Accenture & Vodafone).

Consultancy work requiring efforts of these personnel is charged at a day rate of £1275 per day.

Junior team members include developers, data scientists and GIS / location insights specialists and trainers.

Consultancy work requiring efforts of these personnel is charged at a day rate of £875 per day.

Emu can offer discounts to the above pricing at its discretion and will seek to offer these when support services are procured in parallel to its software product offerings.
