Our Track Record

We work with 78 of the 112 NHS organisations
in London & Home Countries

Digital Transformation Projects

Services provided to 2 NHS organisations including
Programme Directors & Managers, Project Managers,
Engineers, Transformation Leads (clinical & non-clinical)
and Business Intelligence specialists

Managed Service Desk

Team of Service Desk Analysts for 4 month burst
Capacity project relating to roll-out of EPR system

Data Warehouse Services

SOW mandate to provide an experienced Data
Warehouse Developer to assist with a 3 month
project to create a Data Warehouse environment

Case Study – Testing Services for EPR Programme

- Working collaboratively with the Test manager, Clinical and Business Change teams to design test scripts from both current and future state process maps/workflows
- Worked alongside the Test Manager to deliver the execution of the test phases for the project, designing, maintaining and executing the identified application functionality test cases according to the schedule of the project
- Identified and reported all test issues, and supported the resolution/escalation process of the issues
- Documented test results and test evidence to support the outcome of test execution
- Supported the planning and execution of UAT by producing patient journeys and documenting test cases for UAT
- Completed retest and regression testing of fixed defects
- Support data Priming, System and Integration of Sunrise and all other connected systems

GOODMAN
MASSON

"I chose to use Goodman Masson as a Managed Service Provider whilst we were going through a Trust wide EPR 'go-live'. They outlined a clear strategy from the beginning, providing a consultative, quality and affordable solution to our needs against other competitors.

The Managed Service solution was based on a team of Service Desk Analysts for a four month burst capacity project. Goodman Masson provided full project oversight and quality assurance and delivered a high-class solution. Their approach, guidance and delivery has differed to those I have previously worked with. I will work with Goodman Masson again without hesitation and I would highly recommend their services to others"

Head of IT, London-based NHS
Foundation Trust
