## Cyber Consulting, Security and Architecture

The service is designed to provide guidance, assistance, and assurance support to enable the production of secure architectures, policies and processes that are suitable for the business requirements, budget and security requirements. This comes in the form of tailored practical and documentation support through the entire IT and Cyber Security life cycle including integration within Service Management functions. Successful projects within HMG, MoD and MSSP environments have successfully utilised and provided supporting documentation for NIST, ISO27001, HMG IS1&IS2, SFA analysis, MITRE attack framework, Cloud Security Framework and OWASP.

### Features:

- (ISC)2 CISSP and NCSC CCP accredited cyber security professionals
- Risk and control mapping to security focused frameworks
