

Supplier Resiliency Services

Suppliers pose risks to your organisation as they can be a launching pad for attacks on your business operations.

Understanding the risk that your suppliers pose to your organisation can be difficult to achieve. You can send your suppliers questions about how they manage your data and/or IP, how they manage and secure their systems, people and facilities. This is usually accomplished through the use of spreadsheets which can be error-prone and time-consuming. Even getting your suppliers to complete this spreadsheet is often challenging and the final output can be difficult to analyse and interpret. CyberCX can assist through independent compliance assessment of your third and in some cases fourth party supply chain.

Benefits

Comprehensive analytics

Comprehensive analytics which show you where your supply chain risks reside.

Identify high-risk suppliers

Identification of high-risk suppliers facilitates prioritisation and allocation of resources to areas of the greatest need.

Higher supplier response rate

The use of our 6clicks platform for issuing and tracking supplier questionnaires results in greater fidelity and participation

Features of the Service

Supply Resiliency Services builds a fit-for-purpose model for you to pre-qualify (and re-qualify) your suppliers, categorise them by risk and deliver more detailed assessments of the risk they pose to you as required. With tailored analytics, reports and the ability to identify corrective actions (and share them with suppliers where appropriate), we empower you to stop reacting to suppliers and start proactively improving their (and your) security. Our service incorporates managing the scheduling of supplier assessments throughout the year so that no suppliers slip through the cracks.

Our Approach

CyberCX uses the following approach to evaluate and report on each supplier:

Issue Questionnaire:

- CyberCX will distribute a tailored a supplier security questionnaire via our technology platform to all in scope suppliers;
- CyberCX will verify full online completion and submission of the questionnaire by the suppliers, including follow on emails and escalations for non-completion;

Supplier Response Analysis:

- CyberCX will complete an analysis of information derived during the discovery phase in order to identify and evaluate risks against established risk criteria and in the context of your business and its threat environment.

Reporting:

- Preparation of the supplier risk report that includes findings and recommendations;
- Internal rigorous quality assurance review;
- Submission of the supplier risk assessment report.

Why choose CyberCX as your supply chain risk partner?

Supplier risk management simplified

Through the use of our online platform, we greatly simplify the evaluation of risks that suppliers pose to your organisation.

Industry experience
