

Cyber Security Strategic Review

Providing strategic direction around the current state of cyber security, plus priorities for enhancement.

An assessment, from a strategic perspective, to ensure organisation's cyber security strategy and processes are fit for purpose.

This service involves conducting a comprehensive assessment of an organisation's security capability and maturity to provide strategic direction around an organisation's current state of cyber security, as well as identifying priorities for uplift.

Organisational benefits

Requirements Definition

Definition of security needs, strategic drivers and core objectives.

Identification of Gaps

Identification of gaps in governance, operations, resources and technology.

Enable Measurement

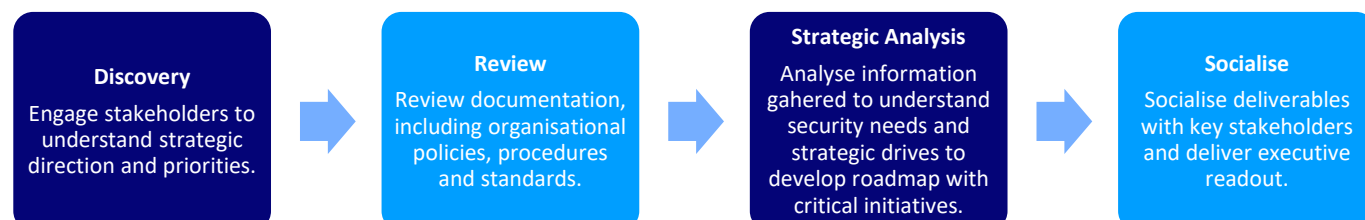

Enable measurement of security improvements over time.

Service features

Conducting a cyber strategic review would include the following activities:

- ▶ Objective and independent assessment of security capability and maturity, including people, process and technology.
- ▶ Analysis of security implications of business and technology priorities.
- ▶ Development of recommendations to address key organisational risks and pain points.
- ▶ Benchmarking against industry recognised and best practice standards.
