For the provision of:

Cyber Essentials & Cyber Essentials Plus Services

G-Cloud 14 Framework

February 2024

Reputable & Established Firm

iSTORM® has the technical expertise to support our clients with their privacy, security consultancy and penetration testing requirements. We deliver services to a wide range of government organisations, private sector businesses and charities/Not for Profits.

We guarantee the quality of our delivery by ensuring that we follow the same exacting standards that we recommend to our clients. iSTORM® ensure that we “practice what we preach” and hold:

- ☞ UKAS accredited certification to ISO 27001.
- ☞ Government’s Cyber Essentials Plus certification.
- ☞ CREST membership.
- ☞ Certification body for IASME Cyber Essentials.

Customer experience is just as important to us as quality of delivery. We build successful partnerships with our clients to ensure you are delighted. iSTORM® will ensure that:

- ☞ We provide *brand protection* through securing data and business assets from the threat of attack.
- ☞ We *delight* our customers through our values of **passion** and **integrity**.
- ☞ We *make our clients more secure* by evidencing and testing their security stance and allowing them to continually improve.
- ☞ Our value of **agility** allows us to flex to meet our client’s needs. No two organisations are the same, and therefore we do not provide off the shelf solutions. We will work with you to define the scope, deliver the testing and to provide the report aligned to your specific needs.

iSTORM® Cyber Essentials certification and support services:

Service	Description of service	Rate
