

TDS Pricing G-Cloud 14

SFIA rate card & Pricing Document.

We are Test Driven Solutions, a global technology consultancy specialising in software development and delivery. We provide first-class consultants who have experience delivering highly successful projects in both public and private sector organisations.

We provide solutions either as an off-site development team or by adding augmented resources to an existing in-house team, and our high-quality software development and delivery consultants can help with either short term or long-term engagements.

Over the past four years we have grown exponentially, and we currently have a head count of 100 + people across the three locations. We also run a successful graduate programme; our graduates from both our 2022 and 2023 intakes are now contributing to the business on client projects.
