

Vatix:

G-Cloud 14 Lone Worker Safety Price List

Introduction:

Vatix's BS8484 accredited lone worker safety system provides real-time protection to tens of thousands of individuals working alone or in at-risk environments. Our comprehensive offerings include a variety of lone worker devices, apps, and alarms, all integrated into an easy-to-use web application that logs every incident and interaction. The system ensures immediate emergency alerts are possible with real-time GPS location tracking and man-down functionality, enhancing response efficiency and worker safety.

This pricing document details three primary options tailored to meet diverse operational needs: A. Lone Worker Device (Safe Pro 4G), suitable for general safety requirements; B. Lone Worker App, perfect for flexible and widespread application across various mobile devices; and C. Specialist ATEX Rated Device (Twig One Ex ATEX), designed specifically for use in explosive hazardous zones. Customers can select the most appropriate solution or a combination of solutions based on their specific requirements.

Additionally, optional add-ons, accessories, professional services, and IT packages are available, enabling customers to customise and enhance their setups according to their advanced features or specific needs. This flexibility ensures that each organisation can create an optimally tailored safety system that maximally protects its lone workers.

PRODUCTS:

A. Lone Worker Safety Device:

The core subscription for the Lone Worker Device provides essential safety and communication tools tailored for individuals in isolated or hazardous environments. Each device features two-way calling, fall detection, 4G with 2G fallback, GPS outdoor tracking, and Wi-Fi for indoor accuracy. It boasts a robust battery life (24 hours to 7 days), an IP67 waterproof rating, and compliance with BS8484:2022 standards, ensuring reliability in various conditions.

The subscription includes a device equipped with a charging dock, cable, UK USB plug, quick start guide, lanyard, and optional accessories like belt clips. Users gain peace of mind with a subscription-long warranty and no upfront hardware costs, as the device is rented.

Service extends beyond hardware with dual UK-based Alarm Receiving Centres (ARCs) staffed by expert Alarm Controllers who manage emergencies and exceed BS 8484:2022 response standards. Data security and privacy are paramount, with compliance to GDPR through ISO27001 and Cyber Essentials certifications.

Subscribers also access a leading cloud-based web application for managing devices, users, and alarms, enhancing safety management with comprehensive usage and engagement reports.

Safe Pro 4G - Device Subscription Plans:

Number of Devices	Initial Contract Term		
	12 Months	24 Months	36 Months
01 to 49	£16.40	£14.35	£13.15

Voice Memo Updates / Activity Timers	£1.35	£1.15	£0.80
Real-Time Map	£1.35	£1.15	£0.80

B. Lone Worker Safety App:

The Lone Worker App subscription delivers enhanced personal safety through a comprehensive safety solution on your smartphone, designed for individuals working in isolated or hazardous environments. Compatible with both Android and iOS platforms, the app includes critical safety features such as two-way calling to connect with alarm responders instantly during emergencies, and an alarm activation that is operable even when the phone is locked, ensuring timely assistance.

Further functionalities include timed work session check-ins for continual safety monitoring, alongside the ability to enrich work sessions with text, voice notes, and images for added context in emergencies. This app is integrated with a 24/7 monitoring service, operated by expert Alarm Controllers at dual UK-based Alarm Receiving Centres (ARCs). These centres not

only meet but exceed the BS 8484:2022 standards for emergency response times, ensuring rapid and reliable assistance when needed.

Additionally, the subscription includes access to a leading cloud-based web application that enables efficient management of users, devices, and alarm settings. This comprehensive platform enhances safety management with detailed usage, engagement, and compliance reports, and maintains a thorough log of safety alarm events, guaranteeing a high standard of data security and privacy compliance, aligned with GDPR through ISO27001 and Cyber Essentials certifications. This ensures that the Lone Worker App not only provides fundamental safety features but also robust data protection and operational reliability.

C. ATEX TWIG - Specialist Lone Worker Device for ATEX Zones:

The TWIG One Ex (ATEX) is an intrinsically safe lone worker alarm device, designed specifically for use in hazardous explosive environments. This ATEX-certified device ensures the highest level of safety for lone workers in high-risk areas by integrating fully with the Vatix platform, enhancing functionality and monitoring capabilities. It offers reliable and speedy communication through 4G connectivity, fall detection for immediate alerts, and a powerful loudspeaker that ensures clear communication under challenging conditions. Additionally, the TWIG One Ex provides real-time alerts, precise location tracking, and two-way communication, all managed via Vatix's advanced cloud platform. This device meets stringent safety standards necessary for operation in hazardous locations, sold outright with a monthly subscription that includes the SIM, round-the-clock alarm monitoring service, and access to the software platform for comprehensive management. Each ATEX Device is purchased outright for £799.

ATEX Device Plans:
