Pricing Overview

Our pricing is based on the requirements and needs of the customer. We will provide you a detailed breakdown of our costs, and how the final price was reached.

We're committed to working in an open and transparent environment, and will provide our customers with access to project effort and time logs throughout the contract to ensure you're always up to date on the latest expenditure.

We are committed to upskilling our staff and helping them improve their skills and knowledge to better support our customers now and in the future. In line with this, we have varying levels for each of our job roles, with the relevant day rate attached to each.

Based on the requirements of your project, we will determine the level of role required and provide you with justification and a portfolio of that individual's work for you to review and approve before we get started.

Breakdown by role

Roles	Junior	Intermediate	Lead
Delivery Lead	N/A	N/A	£700

Mileage:	Included in day rate
Professional indemnity insurance:	Included in day rate

Pricing Structures

We're committed to being open and transparent with all of our customers and work with you to support your preferred pricing structure for the project from the below.

Time and Materials (T&M)	We can provide you with an estimation of the roles and effort required for your project with a capped budget. We'll then provide you with weekly time logs that once signed off will be subtracted from the project value. With this structure, you'll only pay for the work we complete.
Fixed Price	We will provide you with a fixed price that has a detailed price breakdown of the roles and effort required to complete your project. The price for the project will remain the same and payment will be made when key milestones are delivered to a satisfactory standard.

Discount

As a dedicated UK Public Sector supplier, we are happy to negotiate volume or combination discounts on a case by case basis, to meet clients' specific budget constraints. This will be dependent on key factors to the project lifecycle, financials and outputs.
