Data Security Protection Toolkit Support

Service Definition

We can assist you with your Data Security and Protection Toolkit compliance. We can work with you to ensure you achieve the required level of compliance and submit the toolkit for you, working with you.

Our Data Security Protection (DSP) Toolkit support service assists clients in achieving the required level of compliance, then completing and submitting the toolkit. We assist over 50 clients every year to meet the set standards.

Service Features

The main features of this solution include:

- Reviewing your current compliance and data security regime and levels.
- Assistance completing the DSP Toolkit submission, identifying all documentation to be completed, and the understanding of the DSP requirements.
- Providing clear feedback and a roadmap on how to meet DSP requirements and how to stay on track.
- Auditing your toolkit to provide independent assurance as required by NHS Digital.

Deliverables

Deliverables for this service include:

- Pragmatic data protection advice, guidance & management
- Complete Data Security Protection Toolkit planning, strategy & implementation support
- Interaction touch-point for data subjects and stakeholders
- Assistance with Data Security & Protection toolkit submission
- Support with review of framework, policies, procedures, templates, forms or preparing the same to ensure you meet the standards required
- Support with initiatives such as National Data Opt-Out
- Training support to ensure effective business practice transformation & continuous education

Service Levels Features

We can tailor the number of days/level of support/service package to suit the client's needs. We can combine this service with the Data Protection Officer as a Service.
