

Prepared for Public Sector – G Cloud 14

Prepared by: Tenacium DC Ltd

Date of Presentation: May 2024

Security Classification: Customer Public

How we Support our Clients

Tenacium DC offers expertise, guidance and recommendations to help customers address their **Data** and **Cybersecurity** training requirements. We provide skilled workforce across two main themes and four service groups. Our Vendor neutral Consultants, well equipped through our Domain agnostic frameworks are ready to meet your needs.

Advisory - Strategic Services

Our advisory service is anchored by T5™ Framework for Cyber and JEEA™ for Data. These agnostic frameworks provide clean terms of reference to diagnose & provide balanced recommendations to our clients.

A long-term strategic view along with short term tactical deployments, powered by our framework, can be a great fit for our Clients across sectors.

Professional Services

We offer an end-to-end set of Data and Cyber professional services based on our home-grown cyber tools.

Our tools provide the necessary Guardrails across Cyber & Data domains to continuously assess and provide round-the-clock support for our clients.

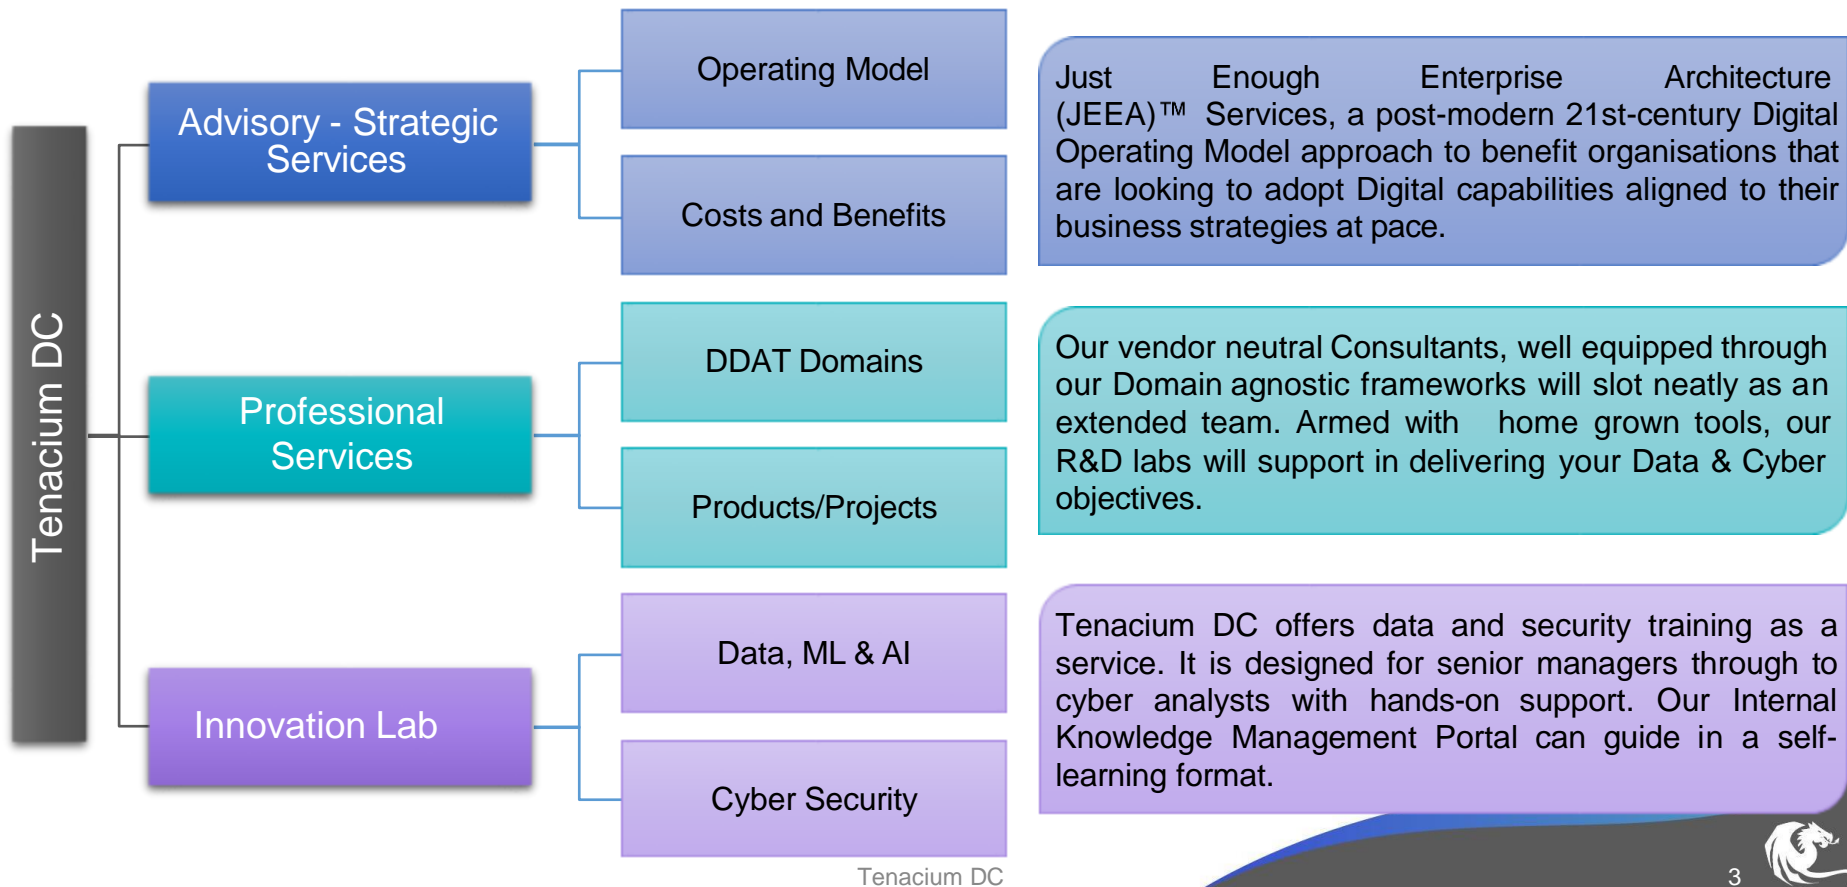

Innovation Lab

As the Cyber threat morphs, we continue to improvise our solutions.

Our Innovation Lab hums with activity in building new 'Little Cyblets' to enhance the resilience of our T5™ framework, weaving the post-modern business fabric across Data, People and Controls

Our Service Themes & Offering

Advisory - Strategic Services
