G-Cloud 14

Pricing

Below is Vizst's pricing based on our standard support packages (see next page for details). We are flexible in our support approach and understand that every customer has unique needs, so we are happy to discuss alternative models.

The majority of Vizst Technology's services can be customised based on your environment, infrastructure, skills and desired outcomes. As such we always recommend an initial scoping and discovery activity to determine the resource profile and pricing for a given call-off request.

Note pricing excludes vendor support, licenses and any hardware.

	<i>Vizst Aware</i> Price/month	<i>Vizst Core</i> Price/month	<i>Vizst Apply</i> Price/month

Order *Process*

Where Vizst Technology has been selected as the only appropriate supplier available on G-Cloud, we will work with the Customer to discuss requirements and produce a G-Cloud Call Off Order Form that describes timescales, dependencies, deliverables, etc. and commits a price. The G-Cloud Call-Off Order Form can then be formally issued and signed by both parties, subject to respective procurement policies and processes. Once a signed Order Form and purchase order has been received, work can be scheduled.

For any further information or where a competition between multiple shortlist or longlist vendors is required as per G-Cloud procurement guidelines, please contact us.
