G Cloud 14 Pricing

Pegasus Labs G-Cloud 13 Pricing

Service	Description	Up to 250 users	Up to 1,000 users	Up to 10,000 users	Over 10,000 users
Phishing Protection	Monitors and responds to reports of phishing, spam or malware from end users. Detects and responds to malicious emails based on AI assessment of emails against global Threat Intelligence.	£2,000	£4,000	£25,000	On Request
AD Compromised Password Protection	Protects Active Directory and Azure AD from common and compromised passwords; resets existing common and compromised passwords; and monitors for AD misconfigurations. Continually monitors and automatically responds to new breaches keeping AD secure.	£1,000	£2,000	£15,000	On Request
O365 Vulnerability Scanning	Monitor Office 365 configuration against good practice standards and custom policies for secure configuration. Detect and remediate common user mistakes in real time. Ensure compliance with standards by auditing your Office 365 configuration and file sharing for non-compliant security controls.	£2,000	£4,000	£25,000	On Request
O365 License Optimisation	Optimise the quantity and cost of O365 and Azure AD licensing by automatically reviewing which licenses are actually used and recommending where licenses can be removed or downgraded.	On Request	On Request	On Request	On Request
Exchange Online Modern Authentication Proxy	Exchange Online is removing support for Basic Authentication. This service allows existing applications to connect to Exchange Online with Modern Authentication without requiring application code changes.	£500	£1,500	£8,000	On Request
Protective DNS Local Reporting	When using an external service, like NCSC PDNS, to block malicious DNS queries it can be difficult to identify the source of the queries within the local network. This service provides visibility into which devices are generating blocked DNS queries in real time without the performance impact of full DNS logging.	£1,000	£2,000	£15,000	On Request
