

Project Management Services

Industry standard or tailored models of delivery

Key Benefits

- Projects are controlled by experts from inception to in-life
- Ensures best use of resources from staffing through to budget control
- RAID management
- Change management
- User adoption and BAU onboarding management
- Project communications (plan and execution)
- Eliminate confusion and increase efficiency
- Communication alignment and reporting
- Governance and Assurance overlay

NextGen UX Project Management Services specialise in planning, coordinating, and executing projects according to specific requirements and constraints. We bring together processes, methods, skills and knowledge to achieve set outcomes or deliverables.

A Project:

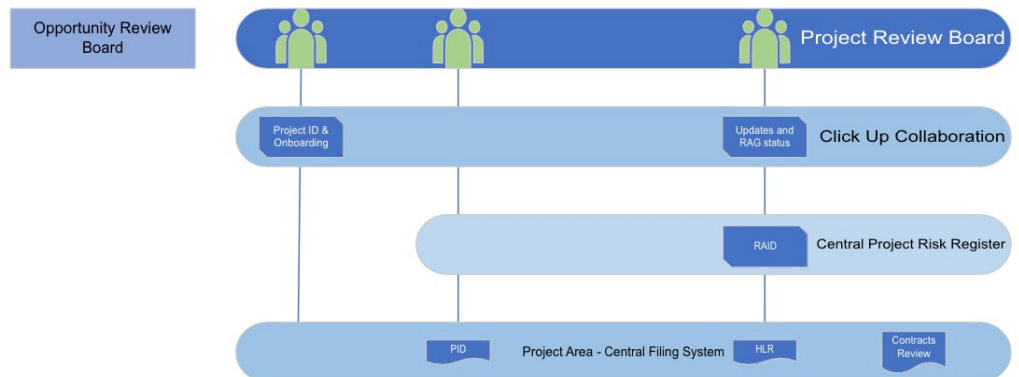

- it is a piece of planned work, which has a defined life span, resource requirement and objective
- involves a high degree of risk
- involves a high degree of complexity

Or:

- An internal endeavour that meets the above criteria

NGUX Project Management
Methodology v1.0

NEXTGENUX

NextGen UX always incorporate a layer of governance and assurance across the project to ensure we place the End User Experience central to our delivery enabling the technology we deliver works for your business so you can focus on your specialities.

We use a defined methodology so that we can firmly produce effective scheduling; control on costs and budget management. Customers' change management processes are followed and enabled early so as to avoid delays. Risk and issue management are central to Project communication and documentation ensuring ownership and resolution.
